

**TWO BIG MEN  
ARE AT WORK.****Taft and Cannon Almost  
Cross Paths.****Former Continues His "Of-  
ficial Inspection" Tour.****Speaker Reaches Chicago on  
a Different Errand.**

[BY DIRECT WIRE TO THE TIMES.]

CHICAGO, June 16.—[Exclusive Dispatch.] Chicago was honored by two active Presidential candidates today. Just as Secretary Taft left for an "official inspection" tour, with campaigning on the side, "Uncle Joe" Cannon arrived.

Friends of Mr. Cannon who came with him brought the news that the speaker is making a campaign for President. He is decidedly more effective than the speech-making tours of his rival. He is holding practically a continuous reception in Danville for members of Congress from all parts of the country who call to pledge their support and leave to spread the Cannon doctrine wherever they go. State Senator Edward Curtis, field manager of the Cannon boom in Illinois, told his enthusiastic callers the speaker is expected to arrive in Danville tomorrow. In his opinion, the chances of Mr. Cannon getting the Republican nomination for President are better now than ever and improving every day. He said he is certain he will have the Illinois delegation to the national convention solely.

Mr. Taft took a morning train to Madison, Wis., ostensibly on a tour to inspect army posts. He will make speeches in Madison and Milwaukee, Rock Island, Ill., in Iowa, Minnesota, South Dakota, in Kansas before returning to Washington, and much benefit to his Presidential boom is expected therefrom.

Speaker Cannon came here to attend the luncheon to Ambassador Bryce, given by Senator Hopkins at Aurora, and he had to leave for Danville in the afternoon to meet several Congressmen, who had telegraphed him to expect them.

It was told about Mr. Taft passing through the city and he commented with a grin on the Secretary's mission, showing he well understood its real purpose.

"Yes, Taft is on a trip of 'official inspection,'" he said. "That's all right; he's Secretary of War, of course, the army posts have to be inspected."

**POLITICAL BRIEFS.****Taft Speaks at Madison.**

MADISON (Wis.) June 16.—Secretary Taft addressed an audience of 1,500 in the gymnasium here today. He was welcomed with tumultuous applause. Included in the audience were the members of the State Supreme Court, a large body of students and many members of the Legislature.

**"Cotton Leak" Trial Begins.**

WASHINGTON, June 16.—In the trial today of Edwin S. Holmes, Jr., in the "Cotton Leak" case, Bartholomew C. White, special cotton crop agent for the Department of Agriculture, identified a number of reports made by him in 1903, 1904 and 1905. In some of these, he said, changes were made in his figures without his authority.

**Elected in Oklahoma.**

GUTHRIE (Okla.) June 16.—The Daily Leader says: In the Democratic primary election, C. N. Haskell of Muskogee, I. T., for Governor has received a majority of 14,000 over the Republican, and R. L. Owen of Muskogee and Roy V. Hoffman of Chandler have been nominated for United States Senators by majorities ranging from 5,000 to 10,000.

**RYAN IS SECRETIVE.**

New York Capitalist Reaches Dublin, but Declines to Tell of Future Plans.

[BY DIRECT WIRE TO THE TIMES.]

LONDON, June 16.—[Exclusive Dispatch.] Thomas F. Ryan, who sailed from New York a week ago Friday on the Celtic, left the steamer at Queens-town early Saturday morning and traveled to Dublin, going to the Shelbourne Hotel in that city. He left the Shelbourne in the evening. Being asked where any letters coming for him should be directed, he answered that he did not expect any, and he refused to say where he was going next. It is reported in Dublin that he went to Glen Cairn, Richard Croker's residence in Ireland, to await Mr. Croker's return from London.

**FRENCH WINEGROWERS  
FOMENT OPEN REVOLT.****Half-Million Impoverished Agrarians  
Swear to Pay No More Taxes and  
Disband Municipal Councils—Effect  
of Drastic Parallel Tremendous.**

[BY DIRECT WIRE TO THE TIMES.]

PARIS, June 16.—[Exclusive Dispatch.] The 500,000 or 600,000 winegrowers who assembled at Montpellier yesterday carried out the programme for which they had gathered, enthusiastically swearing to pay no more taxes, to disband the municipal councils and to force the Republican officials, including members of the Chamber of Deputies, to resign.

The Mayors of Narbonne and other important cities threw to the ground the insignia of their authority, while others promised to take similar action when surrounded by their municipal councils.

As each crowd arrived in the city its eyes were met by an enormous inscription on white bunting, "Parliamentary session of June 27, 1906: Subject, the wine crisis; present, twenty-five Deputies."

"Parliamentary session, November 22, 1906: Subject, increase of Deputies' salaries; present, 53 Deputies; motion for 600 franc salary carried unanimously."

The effect of this drastic parallel was tremendous. There was no disorder, in spite of

er's return from London. Mr. Croker left London this morning for Ireland, but he expects to be back for the Ascot races next week. Mr. and Mrs. Norman E. Mack of Buffalo, N. Y., went with him.

Mr. Croker had accepted an invitation to dine in the House of Commons tonight with John Redmond, but this entertainment seems to have been unexpectedly canceled. Mr. Croker paid a visit to the House of Commons Saturday afternoon when that body was in session, and he was received by John Redmond, William Redmond, T. P. O'Connor and Joseph Devlin. They showed him around the building, and afterward they all took tea on the terrace. Mr. Croker was accompanied by his niece, Mrs. Bowman, and her son.

**THAW AT WORK  
ON DEFENSE.**

[BY DIRECT WIRE TO THE TIMES.]

**PREPARES FOR SECOND FIGHT  
FOR LIBERTY.**

Slayer of Stanford White Each Day Walks Cell Corridors in Company With Italian One. Death for Murder of Two Fellow-Countrymen.

[BY DIRECT WIRE TO THE TIMES.]

NEW YORK, June 16.—[Exclusive Dispatch.] Despite the many reports that he has engaged a new chief counsel, it developed today that Harry K. Thaw, now in the Tombs awaiting his second trial for killing Stanford White, has not yet decided who will direct his defense.

In the solitude of his cell Thaw works unceasingly on the evidence adduced at his trial, preparing a defense, which he will submit to his counsel for their consideration. The routine of his prison life does not seem to dampen his spirits, his jailers declare.

In the solitude of his cell Thaw works unceasingly on the evidence adduced at his trial, preparing a defense, which he will submit to his counsel for their consideration. The routine of his prison life does not seem to dampen his spirits, his jailers declare.

Mr. Thaw's companion within the prison is Raffaele Cascone, awaiting his second trial on the charge of slaying two of his fellow-countrymen. Every day this strangely contrasted pair walk the cell corridors together. The Italian has told Thaw of his thirty-two months' confinement in the "dark house" of Sing Sing until the Court of Appeals granted him a new trial.

Mrs. Evelyn Nesbit Thaw, wife of Harry Thaw, and Mrs. William Thaw, his mother, call at the Tombs every day. The wife and mother are living quietly in their apartment house, and they will remain here during the summer to be near Harry.

Harry Thaw follows the rules and routine of the Tombs and the jailers say he is a model prisoner. He does not eat his prison food. His mother sends him a special caterer. Thaw shows no physical effects from the year's confinement. He is well dressed and his usual prison pallor.

**PREDICTION IS  
MADE BY FISH.****LESS CAPITAL TO GO INTO  
RAILROAD WORK.**

[BY DIRECT WIRE TO THE TIMES.]

NEW YORK, June 16.—[Exclusive Dispatch.] "No more railroads will be built in the undeveloped parts of the United States except at the risk and with the capital of existing lines," said Stuyvesant Fish, former president of the Illinois Central Railroad, in an address before the graduating class in applied science at Columbia University today, he said:

"It is to my mind amazing that the Congress of the United States should with practical unanimity have made this direct step backward, for it will certainly hinder and delay if it does not in some cases absolutely prevent the development of the West and South through the establishment of new jobbing centers."

"It would also seem that under the new law we are to have a valuation of the railroads for the purpose of ascertaining whether or not any of them are over-capitalized, and this apparently to the end of raising rates for railroad freights in proportion to a true valuation."

"In this respect we are likely to have from the law of 1906 precisely the same experience as was had from that passed in 1887, forbidding pooling, from which has resulted that since 1887 no railroads have been built for a share of pools, and the only builders of railroads of any magnitude during the last twenty years have been those who have not pooled, directly or indirectly, the large systems now existing or since brought to a halt."

"The defense expects to begin and end tomorrow unless consummated by the State consummation more time than ordinarily."

**NEW YORK CEASES  
AT STOCKTON.****CARPENTERS MAKE DEMAND FOR  
INCREASE IN WAGES.**

[BY DIRECT WIRE TO THE TIMES.]

STOCKTON, June 16.—[Exclusive Dispatch.] As a result of the refusal of all of the large contractors to pay \$4.50 a day, the carpenters' union ceased today, and the indications are that there will be a tie-up for weeks to come. The union gave notice that on June 16 the wage schedule would be increased from \$4 to \$4.50 a day, and that the contractors who refused to pay the new rate would be considered as having broken the union.

Last week the contractors informed the union that they would not pay the increase, and notified the men that unless they returned to work today at the old schedule they need not expect to be employed. A few of the men went to work under the old rate, but they are working on small jobs. The new scale in no way affects the planing-mill men, and they are working as usual.

The contractors who refused to pay over \$4 a day, especially where many men are not first-class carpenters, but city men, are now refusing to accept their terms inside of three weeks.

The contractors declare they will shut down for the remainder of the year unless the men go back at the old wages. In the meantime many buildings are unfinished. The other unions in the Building Trades Council will support the carpenters. The iron workers returned to work today.

**STATE'S CASE  
IS COMPLETE.****Heney Finishes Evidence  
Against Schmitts.****Surprises Defense by Sudden  
Close of Case.****Dunne's Ruling Causes Act  
of Prosecution.**

[BY THE ASSOCIATED PRESS-P.M.]

SAN FRANCISCO, June 16.—An important ruling by Judge Dunne in favor of the defense early this afternoon brought to a sudden and premature close the case of the prosecution against Mayor Eugene S. Schmitts, for extortion.

The defense, taken by surprise, was not ready to begin the introduction of evidence, so Mr. Campbell, after a fifteen minutes' conference with his assistants and their client, made the opening address to the jury in behalf of the Mayor.

Abraham Ruef, indicted jointly with Mayor Schmitts, and who has pleaded guilty, though paradoxically proclaiming himself innocent, will not be called by the State to testify against the city's chief executive and his former partner in crime.

When the prosecution so unexpectedly closed its case, without having called Ruef, the general idea was that he was being saved by Heney for rebuttal. But the Assistant District Attorney denied that.

"We shall not call Ruef at all," he said. "That opportunity now passes to the defense."

The ruling by Judge Dunne that resulted in cutting short the State's case was the sustaining of an objection to the introduction of a mass of testimony tending to show that the Mayor had made a common practice of playing fast and loose with restaurant and saloon licenses, and had ordered a number of his associates to do so.

This testimony the State proposed to offer under that provision of the law permitting the people to prove the commission of a crime by the commission of similar offenses in other cases.

"But do you intend to show that money was passed in these other alleged hold-ups of licenses?"

Mr. Heney was compelled to reply: "No, but we can show that the motives actuating the Mayor were the same in this case as in the other cases."

At the close of the case, Judge Dunne ruled that the State was not to be allowed to introduce evidence of the commission of similar offenses in other cases.

On petition of the Von Platen and Dick Company, Judge Dunne today enjoined the District Council of the United Brotherhood of Carpenters and Joiners of America from interfering with the complainants. The latter declared the trouble arose because of a disagreement between the defendants and the complainants over the payment of a fine.

On the other hand, the complainants declared the trouble arose because of a disagreement between the defendants and the complainants over the payment of a fine.

**PITH OF NEWS FROM  
THE MIDDLE WEST.**

[BY DIRECT WIRE TO THE TIMES.]

CHICAGO, June 16.—[Exclusive Dispatch.] Gentle April, with her showers and sunshine, came tripping into town today. She was so glad to meet her dear friend June. What with her unexpected visit, Chicago had a cheery day of it. The fair damsel flirted with the city, weeping one moment, laughing the next, until her dimpled cheeks showed. At noon April signalled her temporary reign by shooting off some thunder claps. The maximum temperature was 62 deg., minimum 48 deg. Middle West temperatures:

KEEP SECRET THREE YEARS.  
After waiting for three years for the psychological moment to tell their millionaire father of their secret marriage without incurring his wrath, Mr. and Mrs. Harvey T. Weeks, Jr., are at the Lexington Hotel, unfortunately, but happily, a long way from the home of Harvey T. Weeks, Sr., No. 139 Ashland avenue.

The news of the marriage was made public today and it came as a surprise to both friends and families of the young couple. The bride is 27 years old, a prominent clubwoman and president of Harvey T. Weeks & Co., real estate brokers. Mrs. Weeks, formerly Miss Edith Beggs, is 23 years old, a native of New York, and daughter of a prominent family in the West.

STRIKERS ARE ENJOINED.  
On petition of the Von Platen and Dick Company, Judge Dunne today enjoined the District Council of the United Brotherhood of Carpenters and Joiners of America from interfering with the complainants. The latter declared the trouble arose because of a disagreement between the defendants and the complainants over the payment of a fine.

subject to reprimand, suspension from duty, fine or dismissal from the force, according to the nature of the offense, for any of the following causes or any violation of the rules and regulations governing the force: Disrespect to a superior or other officer; conduct subversive of good order and discipline of the force; for using or uttering disrespectful language about or concerning a brother officer.

Upon these charges Lehnhausen will appear before the Board of Police Commissioners today, but the actual trial probably will not take place until later. In the event of his dismissal or dereliction a vacancy will be left among the lieutenants to be filled by a sergeant, and the one man on the eligible list is far too careful and inactive to ever be removed.

Over the whole Lehnhausen case hangs the shadow of the charges filed months ago against Sgt. Craig, which were never investigated in the open, despite the fact that they were backed by the affidavit of a member of the department. The matter may be forced to the attention of the commissioners at the trial of Lehnhausen.

PASSING OF MAJ. HEWES.  
Well-Known Pioneer Goes to San Diego for Change, and Succumbs.

The death of Maj. Jonathan N. Hewes at San Diego marks the passing of another California pioneer. He was over 70 years of age, and had lived in Southern California more than thirty years. He was a teacher in Santa Ana for several years, and was also a member of the bar, but did not enter into active practice. A man of

MAJ. JONATHAN N. HEWES.

considerable wealth, he lived in a handsome home in Bonnie Brae street for years. This was afterward sold. For the past few years Maj. Hewes had been in the San Diego, on North Grand avenue.

A prominent member of several well-known among a large circle of the well known among a large circle of the old residents of this city.

For some time he had been troubled with asthma, and at San Diego several weeks ago for a change, believing it might benefit him. He was accompanied by Mrs. Hewes. Word was frequently sent to the pioneer had passed away.

His brother-in-law, E. E. Mellette, at once went to San Diego to make arrangements for the removal of the remains to this city.

The funeral, which is to be held tomorrow, will be under Masonic auspices.

## UNUSUAL RECORD.

Priest Who Died Yesterday Served Entire Ministry of Almost Half-Century in One Parish.

A record seldom equaled in the history of church organizations in the West was that of Rev. Mr. Thomas J. Hudson, who died yesterday at Gilroy. It was his lot to serve one church from the time of his ordination to the priesthood until death called him—a span of almost half a century.

Mr. Hudson was the oldest priest in the diocese of Monterey and Los Angeles, and had an acquaintance extending into all parts of the diocese. For a long period he has been a member of the board of advisors to the bishop of this diocese, and served as vicar for the northern part of the diocese.

Forty-three years ago he assumed charge of the Roman Catholic Church at Gilroy, and his life work was closely allied with the development of that place. He was 78 years of age.

For several months past Mr. Hudson has been a constant sufferer, and Bishop Conaty has been visiting him as frequently as he was able to reach the northern part of his large territory. During the bishop's last trip north he went to Gilroy to give religious consolation to the aged pastor.

## BURGLAR INTRUDES.

H. Lauria retired about 9 o'clock last night at No. 245 East First street. When he awakened about midnight, he found that a burglar had robbed him of a watch and some money.

## Throat Coughs

Ask your doctor about these throat coughs. He will tell you how deceptive they are. A tickling in the throat often means serious trouble ahead. Better explain your case carefully to your doctor, and ask him about your taking Ayer's Cherry Pectoral.

OUR FACTORY IS OPEN FOR YOUR INSPECTION. Come and see us make them. Cor. Main & 10th Streets.

AUTO VEHICLE COMPANY.

## GREAT SHOUT SHAKES ROOF.

Unanimous Vote for Owens River Bonds.

Public Pulse Felt at Last Campaign Rally.

City at Parting of Ways in This Big Issue.

If the large mass-meeting in Simpson Auditorium last night is to be taken as an indication of general public feeling regarding the Owens River water bonds, the vote will be overwhelmingly favorable tomorrow.

The audience was a representative one. Cheers and hearty applause were heard at every telling point of the speakers. At the close of the meeting, when Rev. Dr. Baker P. Lee called for a straw vote on the election of a great cheer went up. "No one ventured a dissenting opinion. The atmosphere was not favorable for 'knockers'."

When the meeting was called to order by Rev. Dr. Lee, every seat was filled. He mingled humor and earnestness, saying:

"I speak to you as a Native Son—for I have been in this city for two years and that makes me a native of this glorious State. I have seen the crying need of Los Angeles for water. In the next ten years this city will have a population of not less than half a million. It is when we grow and expand that our needs also grow. We need water—not only for our domestic supply of the future but also for manufacturing purposes. There will be an abundance to irrigate valleys that now need only the magic touch of flowing streams. The speakers will tell you just what this bond election means to each one of you."

The first speaker introduced was Frank G. Tyrrell. He said, in part: "This is the nature of a ratification meeting. All is over but the shouting. [Laughter and applause.] This is a metropolitan in embryo. The city is in its infancy. It is just beginning. It will not be long before Los Angeles has not the modest estimate of half a million, but a million and over. It will be one of the greatest cities in the country. I once lived in St. Louis, a city on the banks of a river with very muddy water. You may remember Mark Twain once said of the rivers of the Middle West: 'In summer the dust sweeps off the rivers in great clouds.' I also lived in Chicago. In both cities I noticed that the water supply bore an intimate relation to public health. Years ago St. Louis should have tapped the headwaters of some pure stream and Los Angeles is going to do so. What did Chicago do? She filled its lakes into secure, if possible, pure water. But it was not a great success. If you wanted pure water there, you had to boil and filter. I want you to take a sledge hammer to it."

"When you vote for the bonds on Wednesday you will be voting for the good health of children. I want you to think that you stand between pallid forms of invalids and grim death; between dear little babes and disease. You will guarantee stalwart, upstanding generations when you register a free man's vote. This is a sacred duty—to aid in the preservation of health. Don't put off

such important matters in the way the stone cutter did. He was asked to carve this inscription on a stone: 'Let her rest in peace.' The line proved to be too long. So the cutter used the initials for the last three words. It thus read: 'Let her R. L. P. Serenely.' There is a higher view of California than the superficial one of mere pleasure. It has a wonderful soil, rich and productive. If water can be brought to it, as you real estate men sing: 'Little drops of water, Little grains of sand, Make a mighty difference In the price of land.'"

MULHOLLAND CONVINCING.

The next speaker was William Mulholland. He chose to be the subject of the present water supply of Los Angeles. With a bas-relief map to illustrate his exposition, the engineer in whom the city has placed so much confidence, showed just what were the conditions at the present time.

He told how the water was obtained from the Los Angeles River by means of tunnels and conduits, a stone bridge to the reservoir. The water-bearing land was formerly on the Pomeroy and Hooker ranches. The city obtained this land by condemnation proceedings. The owners wanted \$1,500,000. They received \$250,000. The speaker said this fact perhaps was understood by the audience. Mr. Hooker towards the proposed Owens River system.

In language so simple that even a child might have understood it, the expert showed that there was practically no more water in or near the river that might be utilized. There is no inches that it was claimed might be developed, there were not more than twenty inches.

The Southern Pacific, he said, had tried to develop water and failed. The Santa Fe had also sought to obtain its own water supply. Great corporations lining the river banks with their factories and warehouses had vainly tried to secure water by sinking wells. There was but a scanty flow.

The speaker emphasized the danger of a dry season. The supply of water, he explained, is barely able to satisfy the needs of this city. There is no water to provide for future growth unless the Owens River is tapped. Mulholland also spoke of the arid belt south of the city, saying that the supply of water was diminishing year by year. There was nothing there to be depended upon. The Owens River was the only solution of the problem.

NOT PLAYING ON LYRE.

In introducing the Mayor, Rev. Dr. Lee said he recalled a verse in the scriptures about harpers harping on lyres. He wished to present a Harpist who did not play on a lyre, but was ready with the simple music of truth. The Mayor said he had not come to the meeting to speak, but simply to "rubber." He did not propose to take up any time that was needed for the ratification of the bonds. He wanted to say just this: "Vote for the bonds. It is the only way to sustain the credit of this city and to build wisely for the future."

J. B. Lippincott reinforced his talk on the Owens River water supply by stereoscopic views. These showed portions of the watershed and the banks of the river and the route of the projected conduits and canals. Diagrams showed the relative storage capacity of reservoirs in various parts and statistics bearing upon the amount of water to be obtained were given.

ONLY ONE MICROBE.

Much amusement was afforded the audience by the gyrations of a fly which had blundered into the scope of the lantern rays. As a view of a mountain lake was thrown on the screen the gigantic figure of some prehistoric insect was projected on the lake. With a roar, the speaker exclaimed: "That is a picture of the only microbe in the Owens River. Let it perish with others of its kind." Lippincott, in his rapid manner,

## REAL ESTATE VALUES.

"I think \$ depreciation in real estate values alone would approximate \$2.1 per cent. should the Owens River bonds fail to carry."—Ben Ward, County Assessor.

It is Mr. Ward's business to keep his eye on property valuations.

sketched the entire situation. He showed just how the water was to be brought to this city; how much it would cost, and how it would be paid for.

At the close of his address, the audience was asked if any questions were ready for the engineers. Only one man ventured to make a query. He asked if the alkali along the banks might not wash into the stream. Engineer Mulholland assured him that there was less alkali there than along the banks of the Los Angeles River at certain spots.

A. P. Davis, who is at the head of the reclamation work, was in the audience. He was asked to say a few words. He received an ovation when he referred to the interest taken in Washington in the project. He said it was recognized by the national authorities that this country took precedence over everything else.

PARTING OF WAYS.

Lee C. Gates made an impassioned speech. He did not go into figures, saying they had been so carefully set forth by the two engineers that every one present must have in his own mind a comprehensive view of the water question.

In closing he said: "We are at the parting of the ways. We must have more water or else let the thousands who are waiting to come to this city that they had better remain at home. We depend on your patriotism, your foresight, and during the twelve succeeding years this amount has been lessened to two thousand inches by a series of drought years and increased pumping for irrigation. The opposition has been challenged to quote from the transcript the testimony they saw heard by court of law \$25,000. It was the man who is hiring men to call the aqueduct project 'the Owens River folly.'"

At the time of the construction of this system, her husband, John Jacob, was a partner in the company which supplied water to the city. The city had refused requests to furnish water to the city. The company had recently laid water mains into the territory supplied by the South Figueroa Water Company.

The justice of the protest was admitted by the board, but it is obligatory upon the water department to furnish water when applicants come under the general rule. However, the city system will not be extended to that territory any faster than is absolutely necessary.

# The Clothes that Mark the Gentleman

Fine Hand-Tailored Garments That Denote Refinement

Clothes well chosen indicate the taste of the wearer. Cultivation finds expression in patterns refined, elegant and fashionable. The man of judgment avoids the coarse and careless, realizing the advantage of nice first impressions, either in business or society.

To the man particular about his apparel, our special hand-tailored garments appeal irresistibly. We select the fabrics and choose our patterns on the taste and judgment of a life experience. Unlike the methods of a large factory, all our garments are made by a small force of experts, to our special order. They reflect in every detail the most refined and fashionable ideas of the day. They have no rivals in the field of ready-to-wear clothes. They give the style, the dignity and the satisfaction expected of custom garments tailored in the large fashion centers of the East.

In the Pomeroy-Hooker case twelve years ago that there was twenty thousand inches of water available in the San Fernando Valley. This is a plain fact. The engineers never gave any such testimony. Mr. Eaton testified that there was less than six thousand inches, and during the twelve succeeding years this amount has been lessened to two thousand inches by a series of drought years and increased pumping for irrigation. The opposition has been challenged to quote from the transcript the testimony they saw heard by court of law \$25,000. It was the man who is hiring men to call the aqueduct project 'the Owens River folly.'"

play as Phoebe. Audrey was there in all her rustic garb, and Miss Lillian Ford portraying this difficult role. And William, he was very good indeed. Miss Evelyn Kellings taking that part. Miss Bullis was the "melancholy Jacques."

The incidental music was very pleasing. "Blow, Blow, Thou Winter Wind," and the "Under the Greenwood Tree," were sung by Miss Ruth Rivers. One of the prettiest pieces of by-play was the dance of Hyman introduced in the last act when twelve pink gauzy fairies with rose garlands tripped a merry measure winding in and out in the very poetry of motion, the Earle Orchestra playing the rhythmic accompaniment.

**AT CUMNOCK.**  
Class day was observed at the Cumnock School of Expression yesterday afternoon with unique and pleasing features. The class of "Naughty Seven" appeared with a tiny and fascinating cherub for a mascot, Richard Wyman Griggs, 1 year and a few months, who marched in alone and held the center of the stage.

The class chronicle was read by Miss Florence Wood, and then came a song of pertinent advice to undergraduates, on all sorts of pertinent subjects. The next number was given by the academy students, who appeared in costumes of the old-time southland, with drooping curls, and sentimental airs, and gave the southern songs and dances, "Swanee River," "Disie," and other airs were sung, and the class song, written by the late Mrs. Kate Tupper Galpin, was sung to the music of "Maryland, My Maryland."

The intermediate farce given was "Six Cups of Chocolate," a take-off on the superior seniors, and the cleverest hit of all was made by the juniors. There is a lovely lad in the Junior class. He was the chief figure in "The Reverses of a Bachelor," for before his vision appeared the girls of his class, representing the feminine world as it had come into his life and heart. The first was his mother, then a little girl who was his first sweetheart, then the widow, the chorus girl, the society girl, the college girl, and all the rest, ending with the bride, the desire of his eyes.

The programme was completed with the senior burlesque, representing "The Sweet Elysian Club." In Elysian just off of Hades, as the play had it. Before each burlesque of a woman's club, and was convincing in its merriment, the cast being as follows: President, Camille; Miss Florence Wood; Vice-President, Miss Ruth Rivers; Frou Frou, Miss Bertha Babcock; Carmen, Maud Lawton; Tribby, Sue Starkweather; Galatea, Frances Parker; Cleopatra, Miss Edna Addison; Fedora, Miss Ruby King; Topsy, Miss Billingsley; and Little Eva, Miss Louise Zimmerman.

**IRRIGATION CONGRESS.**  
Many State Executives to Attend, Including Those of Western States.  
Governors of many States are expected to attend the fifteenth National Irrigation Congress to be held in Sacramento, September 27 next. The president of the congress, George E. Chamberlain of Oregon, has written to the governors of the sixteen Western States and Territories which come under the provisions of the National Reclamation Act, inviting them to be present and especially urging the importance of the presence of the executives of all these States. Governors of other States have also been or will be invited to attend and several are expected to come long distances for the purpose of attending and participating in the congress.

The great irrigation works which are being constructed by the national government in the sixteen western States and Territories are an incentive to keen interest in the National Irrigation Congress, and it is expected that most of the governors of these States will attend. Other States are directly interested in forestry and have a common interest in wise governmental conservation and development of national resources.

**FUNDS MAY BE LESS.**  
Supervisors Likely to Curtail Stipend of S.P.C.A., Which Will Then Cease Burial on Roadside.  
Officers and members of the board of directors of the Society for the Prevention of Cruelty to Animals appeared before the Board of Supervisors yesterday, and urged the board to refrain from cutting off the regular monthly appropriation for this society. For a long period the S.P.C.A. received from the county funds \$100 a month for the prosecution of its work. About a year ago a new arrangement was made, whereby the society agreed to look after the burying of all dead animals found on the county highways, and its monthly appropriation from the county was increased to \$125.

A week ago Supervisor Eldridge undertook to have the entire appropriation cut off, but Supervisor Alexander insisted that the S.P.C.A. officers should have an opportunity to be heard before such summary action was taken. Messrs. Varrel, Frank B. Long, W. B. Trombrow, Godfrey and Whittington took up the cudgels in behalf of the society, and Superintendent Zimmer defended his position in recent suits which President Patterson of the Board of Supervisors declared were founded on overzealousness.

TUESDAY, JUNE 11, 1907.

# KNIGHT DENIES.

(Continued from First Page.)

signify that it is the correct name of the prisoner. There have been cases where one brother, involved in difficulty, used the name of another brother for the purpose of shielding himself.

Knight did not claim, however, that one of his brothers was the man of the photograph, although his inference seemed to be plain.

But Knight's brothers are much younger than he is. One of them was but 16 years old in 1887, and the other was 14, so neither of them is the subject of the photo.

Knight claims to be a thirty-second degree Mason, and he refers with apparent pride to the fact that he was selected by the Building and Loan Commissioners to bring order out of chaos in the affairs of the two Los Angeles building and loan associations.

His boast that he is an expert in building and loan affairs is admitted by those who know of his work.

## WHO FIRED GUN OF POLICEMAN?

HE IS IN THE TANKS UNTIL THIS QUESTION IS ANSWERED.

Officials Investigating Shooting of Newspaper Merchant—Girl in Case Admits Crime, but Circumstances Seem to Place Officer Under Suspicion.

Held on suspicion of being connected in some way with the mysterious shooting of C. H. Wilson, Sunday night, Patrolman Charles Norris is in the tanks at the City Jail, awaiting the decision of his superior officers, who have personally taken up the investigation of the affair.

In the matron's department, not twenty feet away from where Norris is imprisoned, is Lena Carter. She swears that she alone did the shooting and begs to be allowed to sign a confession that will release the others who have been arrested as alleged accomplices.

Wilson, known as "Winnipeg" Wilson, has been a familiar figure on the downtown streets for years and has

MISS LENA CARTER.

amassed considerable property from the sale of newspapers.

Sunday afternoon, he, with Grace Rhyn and Lena Carter, visited the beach and in the evening returned to the lodging-house at No. 525 West Sixth street.

There, according to the stories told by those who were in the room at the time, Wilson became engaged in a quarrel with Grace Rhyn, which resulted in the tragedy.

How Norris, the patrolman, happened to be in the room is still a matter of conjecture. Several stories have been told but Chief Flammer is conducting his investigation without reference to these.

Norris had been friendly toward Lena Carter. He roomed at a lodging-house just across the street from where she roomed. Sunday night he is thought to have gone to her room in order to enjoy the fun afforded by the company.

When Wilson and Grace Rhyn began to fight, Lena Carter attempted to separate them and in so doing was knocked down. A moment later Wilson was shot in the back with a bullet from Norris's revolver, it is alleged. Norris returned to his lodging, removed his belongings to another house and then disappeared.

The police searched for him all night but could not find him. Yesterday he went to the Police Station and gave himself up to Chief Flammer. He explained that, after having done all he could for the wounded man, he had left the house in order to escape the scandal that he knew would attend the arrest. He is a married man.

Yesterday, in her confession, Lena Carter stated that when she was thrown to the floor during the fight, she had become greatly enraged at Wilson and had scrambled to her feet as quickly as possible. Norris, she said, was attempting to separate the man and woman who were fighting and as his back was toward her and his revolver protruded from his holster, she drew the weapon and fired at Wilson.

The police officials are inclined to believe the story but have not yet decided what to do with the officer. He will be suspended when released from the tanks. The others who were in the room at the time of the shooting will be held in jail pending the result of an operation to be performed on Wilson this afternoon at the County Hospital.

**FREE HARBOR PLAN OPPOSED.**

Espee Takes Stand Against Chamber of Commerce's Project for Reclaiming Tide Lands.

The plan of the Chamber of Commerce for securing a free harbor at San Pedro by the reclamation of about thirty acres of tide lands, is strongly opposed by the Southern Pacific Railroad Company.

In behalf of the company Superintendent Ingram has filed a communication with United States Engineer Fries. No reference is made to the possible ending of a monopoly but the official evinces great solicitude because "The Secretary of War has not yet formally approved a plan or project for the general development of the inner harbor and the granting of the application might hinder or render impossible the development of the general plan."

The project of the Chamber of Commerce's Harbor Committee is entirely consistent with the plan of inner harbor development recommended by Captain Fries, it is said. The land which it is proposed to reclaim is in the old Wilmington channel. The plan of the United States engineer provides for a new channel.

**IT WILL PAY YOU**

to see the Star Wars Motor at 224 N. W. Helmsman Building. If you can't come at once to see it, write for circular. Los Angeles, June 10, 1907.

**WHOLESALE DOUBLE.**

It is not the man who served eleven years in prison for forgery he has a chance.

Robert Knight was sent to the county jail, Ill., on February 21, 1907, for a period of six months, his hair Auburn, surrounded in a manner which weighed 100 pounds, and was 5 feet, 8 inches and one-half tall.

It is a peculiarity about the man that he is a photographer. He will be released in September, in which month he has been 25 years in prison. Knight was sent to the county jail, Ill., on February 21, 1907, for a period of six months, his hair Auburn, surrounded in a manner which weighed 100 pounds, and was 5 feet, 8 inches and one-half tall.

**KNIGHT HAS BROWN EYES**

## The Beautiful Emerson-Angelus

### The Delightful Summer Piano That Everybody Can Play

The full enjoyment of music is no longer confined to those who have the ability to play the piano by hand. The ANGELUS is the "Royal Road" to a musical education. It supplies all the technique, and enables the player to put into the music the most artistic expression.

No need to know a note or key. But the better you appreciate good music, the better you can execute it, for the Angelus provides the most artistic possibilities that can be read into the music.

EVERYBODY enjoys the piano, when it is supplied with an Angelus. The mistress of the home enjoys a musical hour to herself, as well as the ability to entertain her guests. The boys and girls love it, and are musically educated by using it. The business man delights in the relaxation he receives, and in realizing that he loses nothing by not having learned to play the piano when a boy.

### EASY TO PLAY. And Easy to POSSESS

A small cash sum, and easy monthly payments afterward. There is no reason to deprive yourself and your family and friends of the constant pleasure that the Emerson-Angelus will be in your summer home. And it is equally delightful all year round.

Just think what it will mean to YOU to be able to play the piano whenever you wish. Just think how the wife and children will enjoy it. And just think how easy it will be to carelessly fritter away the money that otherwise would buy this splendid addition to the home.

Come and hear the EMERSON-ANGELUS demonstrated. See how superior it is to other instruments of the kind—many of which cost much more.

Come and see how we can make your summer home doubly pleasant, and how little it will cost to do it.

## Baldwin Refrigerators for Government Hospitals

...Twenty-Second Year...

The Baldwin Refrigerator Company has been notified that its proposal to furnish the U. S. public health and marine hospital service with refrigerators for the current fiscal year has been accepted, making the twenty-second consecutive year that this important branch of the government service has adopted the Baldwin dry air refrigerator for use in all its hospitals and quarantine stations. So highly were these refrigerators regarded by the surgeons and stewards as far back as 1884-1885, that one of them was included in the government exhibit at world's exposition, New Orleans, marked "Standard refrigerator for hospital use."—Burlington Free Press, August 18, 1906.

Yard for fancy silk worth regularly to \$1.25.  
**\$1.50**  
Yard for yard-wide guaranteed silk worth \$2.00.

## WOMEN'S CLUBS.

**"Taming of the Shrew."**  
Ah, but there was a set of swash-buckling Shakespearean gentlemen at the Ebell Club yesterday afternoon, clad in doublet and hose, and with the roystering, devil-may-care attitudes of Petruchio and his sort, but their voices were really not alarming and their gaudy personalities could not be wholly disguised even in the costumes of a Shakespearean drama; for the actors were dignified matrons who laid aside their accustomed habit to present the shrewish Kate and the rest of that amusing company in "The Taming of the Shrew."  
Forty of girls, splendid of apparel, and very gentle withal, was Baptista, a rich gentleman of Verona, who was portrayed by Mrs. John S. Thayer, father of the two attractive sisters, Bianca and Katherine. Katherine, the

Shrew, was a handsome edition of that familiar character and she really was quite out of temper, and very cleverly enacted, Mrs. Charles E. Curtis taking the title role. Mrs. O. H. Morgan was a charming Bianca and Blondeville, the little maid servant, was taken by Mrs. Fred Hooker Jones.  
The president of one of the Women's Relief Corps in the city as well as a charter member of the Ebell Club, Mrs. Charles Coleman, was that wretch, Petruchio. She was a spirited gentleman and tamed her Katherine just as well as though she really meant all the fierce things she said and looked. Other effective gentlemen in the play were Lucentio, taken by Mrs. F. W. Beau de Zart, who really made a handsome young blade, Miss Edith Benton took the part of Gremio, and Mrs. H. E. Mann, who enacted the role of Hortensio.  
The programme of the afternoon was presented by the Shakespeare department of the Ebell Club under the direction of the curator, Mrs. John Kahn. Shakespearean songs were delicately and artistically sung by a quartette composed of Misses Willy Empe-

ser, Jessica Lawrence, Pearl Teazel and Kie Christian.  
Two fine character sketches given before the play were Katherine, Petruchio, by Mrs. G. V. Horst, and Ophelia, by Mrs. Edward North.  
**HITS OFFICER IN FACE.**  
Business Man, in Hurry to Promote Bond Election, Resents Proffer of Jury Summons.  
Max Meyberg, manager of the Los Angeles Gas and Electric Pictures Manufacturing Company of West Sixth street, was arrested yesterday afternoon on a charge of battery and, after trial before Justice Chambers in the Police Court, was fined \$20 with an alternative of twenty days in jail.  
The battery was committed upon the person of an officer when he attempted to serve a summons upon Meyberg requiring his presence in court as a juror for police cases.  
Meyberg was in a hurry when the officer, in citizen's clothes, entered his place of business yesterday afternoon.

The manager recognized the officer and the paper he held in his hand, it was alleged, but, having an engagement with the Owens River Committee, he attempted to leave the store.  
When the officer handed the summons to Meyberg, the latter, it was alleged, stated that he had been securing funds for the promotion of the Owens River bond election and that he had been hurrying out to do more work of that character when the officer had interrupted him.  
Justice Chambers, in view of the good mission Meyberg had been contemplating, made the fine light.  
**HAPPY CLERKS.**  
Postmaster M. H. Flint will recommend increases in salary for 167 clerks. This will entail an additional pay roll of more than \$10,000. The salary increases go into effect on July 1.

**UNDER OFFICERS' NOSES.**  
Safe Crackers Operate Within Few Feet of United States Marshal's Office--Jewelry Theft.  
Within a stone's throw of officers who for weeks have scoured the country in a vain search for them, safe-crackers, late Sunday night, opened two strong boxes in the Tajo building and rifled several desks in the building. With their plunder, they then went to Third street and Broadway, where another safe was cracked, and more plunder secured.  
The officers occupied by Attorney Schweitzer and Hutchins in the Tajo block were the first to receive notification from the robbers. The safe was broken open and a small amount of money and some valuable papers taken. The stenographer's desk was also rifled and \$40 secured.  
Within twenty feet of the office, the United States Marshal's office is located. His deputies have been searching for the gang of safe-crackers for

# Taxpayers: The Bonds Will Swamp Your Vote

To my mind, and in the opinion of other engineers who have the confidence of those who employ them, it is criminal to spend the people's money on the Owens river scheme when so much water runs to waste down the Los Angeles river every winter, and can be utilized in maintaining the water plane in the manner now being tried successfully by the Riverside Water company.—Expert Engineer's Statement to The Evening News.

(REPRINTED FROM THE EVENING NEWS, JUNE 3.)

## STORM WATERS SUFFICIENT

By Conserving Present Waste  
There Would Be No Need  
to Go Outside

RIVERSIDE SYSTEM PROOF

Engineer Shows How Mulholland Could Resaturate the Drainage Plane

"If you were superintendent of the water system of the city of Los Angeles, what would you do to provide it with water?"

This question was asked of an engineer of forty-five years' experience who began his career on a government railway and has dealt with almost every engineering feature. Today he is recognized as one of the best engineers in the west with the most thorough knowledge of the waterbearing lands of Southern California.

"Certainly the first thing I would do would be to utilize the water floods at the upper heads of the Tehuanga valley. Instead of permitting the water of Los Angeles river to run to waste I would turn it into a system of wells and resaturate the water plane."

"In other words, you would replace the water pumped during the dry months by the water which runs to waste down the Los Angeles river?"

"To be sure. This plan has been successfully tried by the Riverside Water company at Warm creek. Instead of the flood water running to waste into the ocean, it is diverted to the debris cones, where it sinks into the ground and becomes a reservoir for supplying the pumps during the dry months."

"You think, then, that it is feasible to utilize the flood waters of the Los Angeles river at the upper heads of the Tehuanga valley?"

"I am perfectly sure."

"What would be the expense of sinking the wells and diverting the flood waters into them?"

"Would solve the problem."

"It would not be a drop in the bucket compared with the cost of bringing water from the Owens valley."

"If this is a matter of dollars and cents, why has it not been tried by Mr. Mulholland?"

"It has been reported to me that this scheme was suggested to Mr. Mulholland and he replied that it was not worth the statement. I do not know and make no professional reputation on the assertion that if Mr. Mulholland adopted this plan of resaturating the water plane, there would be no loss of a declining water plane."

"Supposing that the rapid increase of population demanded an additional supply, what would be your next step?"

"I would make use of Cattle canyon. It would give the city 2,000 inches of water. There is also a Cattle canyon in the San Gabriel river of the San Gabriel river."

"Supposing that you needed more water after the first year, what other provision could you make to supply it?"

"I would use the water all along the foothills from Arroyo Seco to the San Gabriel river."

"In your opinion, then, there is no absolute necessity to go 240 miles for the Owens river water?"

"Expenditure is Criminal."

"That is the slightest. To my mind, and in the opinion of other engineers who have the confidence of those who employ them, it is criminal to spend the people's money on the Owens river scheme when so much water runs to waste down the Los Angeles river every winter and can be utilized in maintaining the water plane in the manner now being tried successfully by the Riverside Water company."

"Have you any idea what it is going to cost the city to build the Owens river aqueduct?"

"That is problematical. I do not think that \$23,000,000 will do it. I would not undertake it for that sum; say, rather, \$35,000,000 will be nearer the mark."

"Do you believe that the engineers at the head of the project can build the aqueduct for the sum they name?"

"I do not. Mulholland is a practical man, but he picked up engineering from the newspapers. He has no experience in the construction of the Owens river scheme deliberately deceive. They give the measurement of the river at the flood time, leaving it to the reader to assume that this condition prevails the year round. Certainly if these figures come from the aqueduct engineers they give them out for the purpose to deceive."

"Dry at Certain Seasons."

"We all know from the government reports that the Owens river has been practically dry at certain seasons of the year. Mr. Clover has shown this during the time in his editorial. At Citrus in 1904 at the spot Mulholland gave Mayor Harper's party its first view of the river, the maximum flow in the high season was 720 second feet, the minimum was 2 second feet, or 100 miner's inches. In 1905 at Citrus the maximum flow was 720 second feet and the minimum nothing. In the same year in Round valley the minimum flow was, during May, the irrigation season, 7,500 miner's inches, and the dry season, 2 second feet, or 100 miner's inches. They have actual appropriation rights to 14,000 inches. These facts are well known to Mulholland and Lippincott. I did not intend to mention them, but I feel that the public ought to know that when it reads the figures given out by the engineers, they are for the flood season and do not represent the flow of the river the dry season. I am not venturing to your first query. I feel assured that the city can be supplied by the water flood right here by the plan now in use by the Riverside Water company. If this is true, as can be demonstrated by spending \$150,000, perhaps \$100,000, for the Owens river supply of alkali water."

"OUTRAGE ON PUBLIC DECENCY."

MAYOR HARPER is guilty of a gross violation of official ethics in seeking to influence the police department in the forthcoming bond election. According to an order issued yesterday by Chief Kern, "it is the wish of his honor, Mayor Harper, that all of the officers of this department shall not only vote for the carrying of the bonds, but shall actively engage their friends in the matter."

In furtherance of this outrage on the taxpayers opposed to the Owens river folly, and in opposition to the spirit of the rules of civil service, Chief Kern is found publicly urging all officers to get out and work for the carrying of the bonds, "until the time of the election."

Why halt anywhere? Why not order the police to club or arrest any man found attempting to vote against the bonds, or in anywise engaged in opposing their issuance, either by word or deed?

Mayor Harper has transcended all the canons of public decency, by the effort to control the police vote, and by what amounts to a practical order for every officer to get out and do politics. Even those citizens who follow the bond issue should rise in revolt against this outrage. It establishes a dangerous precedent.

POMONA'S STORAGE PLAN.

Scientific American: At this time, when enormous sums are being expended for the storage of storm waters and the construction of various irrigation projects, the novel method of conserving storm waters in Southern California may be of interest. Pomona, a city of 8,000 inhabitants, was formerly supplied with water from artesian wells, but as the number of these increased, and the water level fell, and pumping became necessary. Since that time many more wells have been sunk and pumping plants have been installed, which caused the water level to fall, during the irrigation season, to eighty feet below the surface. A tunnel was then result the water level, which fell above the wells, until now the end of the tunnel is 125 feet below the surface. The water in the tunnel diminished as that in the wells lowered, even though a number of flowing wells were obtained in the bottom of the tunnel.

Four years ago the winter flood waters from the San Gabriel river, about four miles distant from the tunnel, were diverted from their course and spread over the rocky land above the head of the tunnel. A stream of several thousand inches when "fanned out" disappeared within a few hundred yards and about two miles from the tunnel. The following September the water level in the wells below rose several feet, and the flow from the tunnel was materially increased. Tills was then secured to 6,000 inches of storm waters, and each year the amount of water was increased systematically carried on. The cost is small, two men doing the entire work. As the result the water level, which falls as a result of pumping operations during the early summer months, has risen in September each year since storm waters have been spread. The average height of water in the wells has risen many feet since the tunnel was put in. The tunnel has increased to such an extent that the city now derives its entire domestic supply from that source. A number of wells are now flowing for the first time in ten years. This flooding begins usually in December and continues until May or June, depending on the amount of rainfall in the winter months.

was presented by the Shakespeare department of the Club under the direction of the curator, Mrs. John. Shakespearean songs were delicately and artistically sung by a quartette composed of Misses Willy Em-

## Why Mortgage Your Home?

If the cost of the conduit is kept at \$25,000,000, the average individual mortgage on property will be \$100. If it is fifty millions, as is certain to be the case, each voter's share in the Owens river folly will cost him \$200 for every one dependent on him, plus interest for forty years.

From April 18 to date, I have, through the columns of The Evening News, given to the public the story of the Owens river folly, and the methods so exposed constitute specific charges of so grave a nature that it is important that every citizen should ponder them carefully.

I fully understand my position in this matter, and know that this gang of schemers and their allied supporters would make it uncomfortable for me if it were not for the fact that their sworn evidence is of record, their published reports are in existence, and the fake tunnel is at Elysian park, all of which give positive evidence that my every utterance is the plain truth.

In those letters I have shown, by the sworn testimony of a number of engineers, that we have as much water flowing through the sand and gravel down through our city to the ocean as the greatest amount the boomers pretend they can bring from Owens river. I have shown that this water has been willfully withheld from us while we suffered for it, and I have shown the duplicity practiced in order that the folly might be continued. I will now repeat, in as condensed form as possible, the most important facts set forth in those letters.

III

The only way to determine the amount of water in a Southern California stream is, first, to study its drainage area and the conditions therein existing. Here, in the Los Angeles river area, nature has formed a natural condition by which all of the water from more than 300 square miles of towering mountains, together with 180 square miles of valley, is conserved, there being no loss of this water, only in case of an extreme storm in the mountains, or in case of a cloudburst, and such times are small and of short duration, that I doubt if one in a hundred of our citizens has ever seen a rise in the Los Angeles river that would be considered a flood.

IV

March, 1896, at the trial wherein the city of Los Angeles was condemning 312 acres of land for the purpose of developing the underflow water it contained, Fred Eaton testified that there were 480 square miles of drainage area above the Narrows, north of West Glendale, and that there was no other escape for the water from this area, except through these Narrows. J. B. Lippincott testified that at least one-third of the whole mass was water, and this entire 480 square miles of area. Mr. Mulholland testified that there had been ten rises in the Los Angeles river in seventeen years, and his description of those rises shows there were but two of them that could be designated as floods, they lasting nearly a full day, while the other eight receded in a few hours in each case. Then from this area of 480 square miles of water, the little dam that was used to divert the water into conduits. Also, at this same trial, it was shown that the San Fernando valley was filled with the debris washed down from the mountains, and that for an unknown depth it was a deposit of boulders, gravel and coarse sand, that was honeycombed with voids to the extent that at least one-third of the whole mass was water. This was agreed to by the numerous engineers giving testimony in the case, although Mr. Eaton, at one point in his testimony, said that a portion of the valley contained forty-eight per cent water.

V

For this calculation, I will take the figures and facts as testified to by the chief promoters of the Owens river folly, Messrs. Eaton, Lippincott and Mulholland. Drainage area, 480 square miles; multiply this by 640, the number of acres in a square mile, and we have 307,200 acres; then multiply by 43,560, the number of square feet in an acre, and we have a total of 13,381,632,000 surface feet in the entire drainage area of the Los Angeles river. These figures, if we have a body of water 12.95 feet deep, then divide by 31,536,000, which is the number of seconds in 365 days, and it will reduce this body of water to a continuous flow of 849 cubic feet a second; then multiply by fifty, which is the number of miner's inches in a cubic foot, a second, and we have 42,450 miner's inches continuous flow. From this deduct one-third for evaporation and the support of the plant life, which is a liberal deduction under the conditions that exist in this area, and we have 28,300 miner's inches; then deduct 6,000 inches for storm run-off, which is more than double the amount that Mr. Mulholland's testimony would indicate it to be, and we have 22,300 miner's inches continuous flow. This is the water that is conserved in the Narrows on its way to the ocean, the remaining 2,300 inches being the surface flow that is now being supplied for our use. If at any time we should require more water, there can be reservoirs placed in the Big Tehuanga canyon that would store the 6,000 inches of storm water run-off, and we would have the entire 28,300 miner's inches continuous flow. What is a miner's inch, a question often asked; it flows 12.95 gallons a day, or, approximately, nine gallons a minute.

VI

The San Fernando valley is a natural storage reservoir of such great capacity that it is giving off the 23,300 miner's inches continuous flow alike in either dry seasons or those of greater rainfall, and it is replenished each year by the rainfall of more than 300 square miles of towering mountains, that send their waters rushing down through the numerous canyons to its margin, where there are large, almost level stretches of boulders that are as open as a sieve, letting the water drop through to great underground reservoirs. It has been herebefore been shown that one-third the mass of this great reservoir is water, and that Mr. Eaton testified that portions of it contained forty-eight per cent water. Now let us figure the amount of water we have stored, at all times, above a level of 132 feet.

This reservoir has an area of 180 square miles. Multiply that by 640, the number of acres in a square mile, and we have 115,200 acres; multiply this by 43,560, which is the number of square feet in an acre, and we have 5,018,112,000 surface feet; then multiply by forty-four, which is one-third of 132, and which is the portion of that water that is stored; then divide by 31,536,000, the number of seconds in 365 days, and we find that it would make a running stream of a fraction more than 7,000 cubic feet a second for one year. Now multiply by fifty, and we have it reduced to 350,000 miner's inches; then divide by 30,000, which is the number of miner's inches the Owens river aqueduct is supposed to convey, and we find that it would take seventeen years and six months to draw the water down 132 feet in our natural reservoir, and that without its being replenished with one drop of water.

VII

To develop this water intelligently is a cheap, simple method that every citizen can understand, without the advice of gentlemen with either an affix or a prefix to their names. Begin under the Buena Vista street bridge with a tunnel, thence drive it into and along under the west bluff of the Los Angeles river, until it reaches the Narrows, north of West Glendale, and then drive one foot fall a mile, it would be 132 feet below the surface of the water; then turn it to right angle, and drive it across the channel, where it would intercept all of the water down to that level. This development would give us at least 11,000 miner's inches, or as much as the aqueduct schemers are now claiming:

LOS ANGELES, June 7.—To the Editor: The quantity and quality of Owens river water is of no consequence to the citizens of Los Angeles as a domestic supply, if they have plenty of the fluid at home that they already own and that can be developed and supplied to them without the raising of water rates. Everyone knows that the principal and interest of this \$24,500,000 will have to be paid out of the water-earnings, thus adding more than \$1,700,000 each year to the present cost, which would make water rates more than two and one-half times as great as they are at the present time, and, as stated in the aqueduct report, that cost would be without covering the conduit or constructing the reservoirs, which will cost a large additional sum.

These schemers avoid all discussion as to the supply of water that we own here at home, and their whole endeavor is to divert attention from it. Also, it has been unearthed, and they have admitted that the power companies are working for the Owens river scheme, and the fact that one of the heads of these companies, together with the managers of newspapers, purchased a large tract of land in the upper part of the San Fernando valley is conclusive evidence that it is an adroitly worked corporation scheme; also the fact that the politicians are going to the unheard-of extremes in ordering all the city employees to work for this scheme, and even the police force is compelled to neglect its duties for its benefit. This is conclusive evidence that there is something wrong. Everyone knows that the corporations and politicians reap their fat harvest off the masses, and it is time the people, who pay the bills, were giving the matter serious thought.

BY VERITAS

neither would it be unwholesome pond water, but, instead, it would be clean, filtered and wholesome. Then, if we should ever require the remainder of the underflow water, there can be a submerged dam put in that will raise it to the tunnel. Now, the city owns all of this water, and nearly all the right of way for this tunnel, and the little portion lacking would only cost a trifle. By putting down a few wells, and equipping them with deep-well pumps, to supply the present needs, and by stopping the use of public funds for the purpose of deceiving the public, this permanent development can be made from the earnings of the water, without bonding, without raising the water rates, and without raising the tax rate.

## PLENTY OF WATER AT HOME

### CONVINCING ARGUMENTS PROVING THAT A SUPPLY SUFFICIENT FOR A CITY OF TWO MILLIONS IS AVAILABLE IN THE LOS ANGELES WATERSHED

LOS ANGELES, June 7.—To the Editor: The quantity and quality of Owens river water is of no consequence to the citizens of Los Angeles as a domestic supply, if they have plenty of the fluid at home that they already own and that can be developed and supplied to them without the raising of water rates. Everyone knows that the principal and interest of this \$24,500,000 will have to be paid out of the water-earnings, thus adding more than \$1,700,000 each year to the present cost, which would make water rates more than two and one-half times as great as they are at the present time, and, as stated in the aqueduct report, that cost would be without covering the conduit or constructing the reservoirs, which will cost a large additional sum.

These schemers avoid all discussion as to the supply of water that we own here at home, and their whole endeavor is to divert attention from it. Also, it has been unearthed, and they have admitted that the power companies are working for the Owens river scheme, and the fact that one of the heads of these companies, together with the managers of newspapers, purchased a large tract of land in the upper part of the San Fernando valley is conclusive evidence that it is an adroitly worked corporation scheme; also the fact that the politicians are going to the unheard-of extremes in ordering all the city employees to work for this scheme, and even the police force is compelled to neglect its duties for its benefit. This is conclusive evidence that there is something wrong. Everyone knows that the corporations and politicians reap their fat harvest off the masses, and it is time the people, who pay the bills, were giving the matter serious thought.

BY VERITAS

neither would it be unwholesome pond water, but, instead, it would be clean, filtered and wholesome. Then, if we should ever require the remainder of the underflow water, there can be a submerged dam put in that will raise it to the tunnel. Now, the city owns all of this water, and nearly all the right of way for this tunnel, and the little portion lacking would only cost a trifle. By putting down a few wells, and equipping them with deep-well pumps, to supply the present needs, and by stopping the use of public funds for the purpose of deceiving the public, this permanent development can be made from the earnings of the water, without bonding, without raising the water rates, and without raising the tax rate.

Everyone knows that, in diverting water from a stream, it does not affect the flow above the point of diversion, likewise this diversion would not affect the water in the San Fernando valley; it only takes the water that flows to it, which, if not diverted, would continue on its way to the ocean.

VIII

In March, 1896, the city of Los Angeles condemned 312 acres of land in the lower end of the San Fernando valley, for the purpose of developing the underflow water it contained, that the city might have an abundant supply of clean, wholesome water. There was then, and is at the present time, a conduit leading to and conveying the unwholesome surface flow of the river to the city. This land, with its abundant supply of clean underflow water, lay untouched for ten years, then Mr. Mulholland blasted his second worthless tunnel, 2,400 feet in length, through the rocks and shale of the bluff, and claims that this tunnel, and a little pumping plant, have jointly developed 199 miner's inches of water. This tunnel, like the Elysian park tunnel, which I will hereafter describe, never touched the underflow water.

I cannot fully understand his object in driving this tunnel, as the little mite of water it developed would not have justified more than the boring of one ten-inch well; then it was driven long after he began reporting there was no more water up the river. It was while on a tour of investigation I made the fifteenth of last month that, after passing over a tortuous route, through the sand and willows, I discovered this tunnel; I also discovered that he was constructing a large, substantial pumping plant on this same land, near the lower end of the tunnel. Apparently, this improvement was being kept a profound secret, for the reason that it belied Mr. Mulholland's numerous published statements to the effect that there was no more water up the river, that he had no Slauson's station to find a little water, and that the last drop of water obtainable this side of Owens river was down on the shoeing annex. While, it aggravated the schemers, nevertheless the fact was given to the public next day, through the columns of The Evening News.

IX

February, 1903, the city took over the water system, also Mr. Mulholland, from a private company, and in the transfer the city acquired a tract of land on the river which is known as Crystal Springs, and is where Mr. Mulholland developed 760 miner's inches of water—while in the employ of the private company—but, since the city acquired this land, he has not so much as cared for that development, and, apparently, it has gone to entire ruin. This tract of land, like the 312 acres in the lower end of the San Fernando valley, had a large conduit leading to the city, and on either of those tracts of land Mr. Mulholland could have developed an abundant supply of clean, wholesome water at a very small cost. But, instead, he has been engaged in driving worthless tunnels, apparently for the sole purpose of making the public believe there was no more water this side of Owens river, and all these years he has been withholding the clean, wholesome water, supplying us, through these same conduits, with surface flow water, which is impregnated with decaying reptiles, frogs, bugs, insects and death-breeding organic matter, always so plentifully found in warm climate streams.

X

In 1903, when we had the prearranged water famine, and lawns were dried brown, lakes in the parks became stagnant, and the sewers were unflushed, all of which was breeding sickness and death, according to Mr. Mulholland's reports, there was an abundance of water for all purposes, if he had not withheld it from us. In his aqueduct report, he says: "The flow of the Los Angeles river for 1906 was 45.53 feet a second, which is equal to 29,356,000 gallons, and which is fully one-third less than was considered a mean flow of the river from the time when pumping began in the San Fernando valley. It shows that there were a number of pumps placed at work in those three years, thus there should have been more water in 1903, but for this calculation we will take the smallest amount of surface water that he mentions in his report, where he says, in 1904, he was delivering into the reservoirs 27,355,000 gallons from the river. Now, by referring to diagram No. 1 in this same report, it shows that we had a population at that time of 130,000, but, in order to be liberal with him, we will call it 140,000, and then the river water alone would have given us 194 gallons per capita, or four gallons more than the greatest amount that he claims we have used at any time; thus he convicts himself, by his own report, of withholding water from us."

XI

Also in 1903, Mr. Mulholland drove the fake tunnel, beginning it at the pumping station in Elysian park, first by blasting a shaft that is fifteen or eighteen feet in diameter, down to a depth of about 100 feet, and placing a steel railway from the top to the bottom of the shaft. Then from the bottom of the shaft, angling a little off from the dry bluff, but at all times keeping it in the solid rock and shale of a low spur of the bluff, that is covered over with sand and gravel. Next, he drilled nine wells, or more (he admits nine), from the top down to the tunnel; then, just far enough below the tops of these wells to be invisible, he let a little water, that he claims to be 400 miner's inches (which is equal to 344 miner's inches) drop down into the tunnel, and pumps it up again. He has been telling us for the last four years that he had driven this tunnel across the channel, and that there was no more underflow water; also, that there was no more water up the river, and that he was compelled to go south of the city, where he had found a small amount of water, and that he could get a little by going down on the shoeing annex.

Now, how does this look to the taxpayer? Here we find the large, expensive shaft, and 3,300 or more feet of tunnel, all driven in solid rock and shale, and it never touched the underflow channel, nor even so much as pointed toward it. Yet all this vast waste of public money for the little mite of 344 miner's inches, when he could have followed the example already set by the ranchers above, and the manufacturers here in the city, and have drilled not to exceed three wells anywhere in the channel, and obtained that amount of water, thus saving the entire cost of the shaft, tunnel and six wells. If he had driven these nine wells, or even twice that number, on either of those tracts of city land up the river, and equipped them with deep-well pumps, they would have supplied us with an abundant supply of clean, wholesome water, instead of the filthy surface flow. We ask why has he withheld this great abundance of wholesome water from us, and squandered our money in driving fake tunnels? Was it for the purpose of encouraging the citizens into voting \$23,000,000 for bonds?

XII

Mr. Mulholland, in a quotation from his fourth annual report, says that July 1, 1905, the city sources of supply at that time were forty-six cubic feet per second, or 29,356,000 gallons a day, and that the city was then using 30,000,000 gallons a day, making a total of seventy-one cubic feet a second, which is a little more than 46,000 miner's inches continuous flow. Then he says, further: "There are now in use in the city of Los Angeles 15,810 meters, or thirty-one per cent of all taps. The effect of the use of meters is indicated by the fact that the average summer consumption in 1906 was about 35,000,000 gallons a day, as against 34,000,000 gallons a day for the summer of 1905."

This shows that he withheld 12,000,000 gallons daily from us in the summer of 1905, and 10,000,000 gallons daily in the summer of 1906, the year that City Attorney Mathews caused the fake injunction to issue against the San Fernando ranchers (they never paid any attention to it). Thus Mr. Mulholland has convicted himself, by his own reports, of withholding water from us three years out of the five that the city has owned the water works.

XIII

In my letter of April 18, I published the fact that there was plenty of water up the river, and that Mr. Mulholland had made no attempt to develop it; and April 20 I exposed the fake tunnel. Now, if these statements had been untrue, would not Mr. Mulholland at once have denied the charge, and started a pump lifting the little mite of water from the bottom of the shaft, and said: "Come, all you doubting Thomases, and I will show you that this is not a fake tunnel. I will show you that it is not solid rock, and I will show you that it does extend across the channel?" But he did not dare deny these truthful facts. He and his associates in this gigantic folly are relying on diverting the public attention to the Owens river. They know too well what the effect would be if the people understood their peculiar workings here at home.

VERITAS.

Postmaster M. H. Flint will recommend an increase in salary for 107 clerks. This will entail an additional pay roll of more than \$10,000. The salary increases go into effect on July 1.

BY VERITAS

neither would it be unwholesome pond water, but, instead, it would be clean, filtered and wholesome. ### QUESTIONS AND ANSWERS THAT BRING OUT THE PLAIN FACTS, THE TRUTH, CONCERNING THIS GIGANTIC OWENS RIVER BOND IMPOSITION.

Question—What is the proposed Los Angeles aqueduct?

Answer—It is a piece of gigantic folly that will cost the taxpayers fifty millions of dollars, or more, increasing their taxes three times the present rate.

Q.—Where is the Owens valley?

A.—About 250 miles northeast, on the east, or desert, side of the Sierras, where the alkali lakes abound, and the river water is so strongly impregnated that natives of that region never drink it.

Q.—Why go so far for water?

A.—Because the superintendent of the Los Angeles water works and other conduit promoters are "loco" on the subject. They ignore the abundant supplies in the watershed at home, and are deceiving the people by saying Owens river is the only source of supply available.

Q.—How long can the present source be made to supply city?

A.—By impounding the waste waters of the Big and Little Lajas, and by developing the underflow of the San Fernando valley, enough water can be furnished to supply a city of two millions, for one-twentieth the cost of the conduit project.

Q.—Why not store the San Gabriel flood waters?

A.—It is feasible, if needed, and will save the ranchers in the valley from constantly recurring damage to their property by reason of the heavy overflow.

Q.—How much water is there in Owens valley?

A.—By blending the maximum and minimum flow, a constant discharge of 20,000 miner's inches could be maintained.

Q.—How much of it does the city own?

A.—About 4,000 inches. As the river runs dry at times, ownership is not certain. To fill the conduit will take ALL the water in the river, together with the surplus, or flood, water. The city does not have the right, prior filings being established.

Q.—Is not Owens lake salt?

A.—Yes, made so by the alkali bed and by the constant flow of the Owens river, which is strongly alkaline.

Q.—Is the Owens river pure?

A.—It is at its source, but the city's rights begin at a point twenty or eighty miles below the headwaters, the river proposed point of diversion being the seepage and reservoir of the valley, which the river drains. Before getting to Charlie's Butte, the intake point, it flows over many miles of volcanic rock, pools, morasses and alkali flats, becoming so impregnated with alkali that it is unfit for drinking. The old-timers avoid drinking the river water.

Q.—How do you know this?

A.—By the official reports of Professor Chatard, of the United States geological service, by the analyses of Professors Lunge and Dewar, who show 27.4 grains of alkali to the gallon, and by the abundant testimony of residents of the valley.

Q.—Is it possible to bring this water to Los Angeles?

A.—It appears to be feasible, but the cost is prohibitive, and it will be needed.

Q.—How much will it cost, and how long to bring the water?

A.—From fifty millions upward. Time, anywhere from five to ten years. The engineering experts admit they know about the quantity of water owned, but say more water must be purchased to fill the conduit. One of them writes "I am sorry he had to compress four months' work into eight days. They were in the valley eight days! This is how the water was safeguarded! Unfinished, they think \$24,000,000 will cover the cost, but admit that more will be required to complete it.

Q.—How about the reservoirs?

A.—The reservoir, according to Mr. Holloway, brother-in-law of the former owner, Mrs. Orr, is one of the worst in the valley. It is ten miles below Owens lake,

and will be fed from precisely the same sources that now flow into Owens lake, providing the city acquires the right to store the flood waters, which it has not yet accomplished.

Q.—Is the present water works a success?

A.—In a measure, yes, but the authorities have been grossly derelict in failing to avail themselves of the opportunities of increasing the supplies provided here at home. The fact that it pays handsomely is no reason why extravagant salaries should be awarded. The consumers should get the benefit of the surplus by decreased water rates. A reduction of ten per cent in five years is a mere bagatelle.

Q.—Can the aqueduct pay its own way when built?

A.—Not on the present showing. It will be an elephant on the taxpayers' hands for years to come.

Q.—How about the power plants?

A.—Absolutely no provision is made for their installation and equipment. They will cost from seven to ten million dollars, which must be met by another bond issue. If the power ever is developed, the local power companies will take them in at their own figure.

Q.—Will the \$23,000,000 of bonds be sold immediately?

A.—No, because there will be no purchasers. The issue will be offered at four and one-half per cent, and perhaps two millions will be absorbed. Municipal bonds no longer are regarded as gilt-edged security.

Q.—Will the issue of these bonds be burdensome to the taxpayers?

A.—Most assuredly. With the sale of the bonds, if ever they are sold, the interest cost will be \$1,095,000 annually; add \$612,500 for sinking fund, and a total of \$1,707,500 appears, which will about double the city taxes. To complete the system, taxes will be tripled. This amounts almost to confiscation.

Q.—Will there be a good business management?

A.—Judging by the efforts to deceive the people in the present campaign, the future cannot hold great promise for them.

**VOTE NO ON THE BONDS AND SAVE YOUR HOMES FROM REVERTING TO THE MORTGAGE HOLDERS, THE BOND BUYERS. IF YOU CAN STRUGGLE THROUGH, THE BEST YOU CAN DO IS TO PAY FOR YOUR PROPERTY TWICE OVER, IF THE BONDS ARE VOTED.**

## EATON ABANDONED PROJECT

### Found Water in Cottonwood Creek Insufficient for Irrigation Scheme

"They may vote the bonds, they may start building the ditch, but they will never bring Owens river water into Los Angeles, in my opinion," said Edward A. Hoffman, president of the Hoffman Hardware company. "There isn't much water to bring," he added.

"Eight or nine years ago," said Mr. Hoffman, "in company with Fred Eaton and two others I visited the Owens river country on an investigating trip. We were considering a project for bringing the waters of Cottonwood creek down to the valley land for irrigation purposes. It was in the fall of the year, September, I think, and it was extremely hot. Our investigations led us to abandon the project, for we found there was not enough water in Cottonwood to warrant such an undertaking.

"Up near the source of the creek we found about 300 inches of water, but at that season of the year the evaporation is so great that a mile and a half before the creek reached the lake the stream disappeared and was perfectly dry in the day. About 9 o'clock at night a little water would appear and there would be water running in the morning. When the sun got well up it would dry up again.

"Down by the lake was a ranch which depended on the waters of Cottonwood for irrigation. In the middle of and latter portion of the day there was no water to be had for drinking, even from the creek. At that time Mr. Eaton was well satisfied that the stream was of no account as an all-the-year-round dependable stream.

"If Mayor Harper had taken his trip to the valley by himself and had taken pains to inquire regarding these matters of the residents there, he might have acquired valuable facts.

"After we had explored the creek we camped on the banks of Owens river. At that season of the year the water was undrinkable. I do not believe anyone could drink the water, at that season, and live. It was terrible.

"In my judgment there is not enough money in Los Angeles to build the conduit. It will cost the \$23,000,000 to build the tunnels. There are sections where a million dollars would not build five miles of the conduit. Long before it is ready to receive the water it will have been warped and cracked by the sun, undermined by burrowing animals, pushed out of shape and cracked by the swelling and shrinking of the earth banks, and, as I have remarked, if the water was brought here, there isn't much of it and that not fit for use. I think the only water worth going after in that direction is the Columbia river, and that is just about as likely to get here as the Owens river."

## Don't Be Fooled!

A vote for the bonds is a vote to saddle yourself with a prohibitive tax that may cost the struggling purchaser all he has put into his home. The burden of individual debt will be nine times greater than the average per capita debt of the ordinary citizen of the United States. We have plenty of storm water here to be saved at one-twentieth the cost. Why go 250 miles to impound waste water?

(REPRINTED FROM THE EVENING NEWS, MAY 21.)

## EAST LOOKS ASKANCE

Outside Capital Will Fight Shy of Investment Here if Colossal Debt Is Placed on Property.

"William Mulholland, superintendent of the Los Angeles water works, and the Los Angeles Times, as the momentary capital from the city," declared David Bayless, a resident of this city, who has had forty years' experience with land and water improvements and is one of the best known men on the Pacific coast.

"It has been persistently and maliciously hammered into the people and spread broadcast through the east that Los Angeles has outstripped its water supply.

"Mulholland last year before the board of public works, stated with tears in his eyes that the city was 'up against it.' It was facing a water famine. This was faithfully reported by the papers booming the Owens river water and ever since then the people have been told that the city is 'up against it.' 'I go east three times a year,' continued Mr. Bayless, 'and I meet and talk with men worth millions. When I try to interest them in Los Angeles property they say, 'Why, you haven't any water in Southern California. We won't invest our money in a desert. Yes, we understand the city is figuring on bringing water down from the Owens river, but when will you get it?' Four years? Not; don't tell us that. We know too much about water conservation to be taken in by such a story. 'What's it going to cost?' Twenty-three million dollars? You're wrong again. It will be less than \$10,000,000. Now, do you suppose that we are going to invest in Los Angeles property and help pay the principal and interest on the heavy debt the city will assume on the cock-and-bull story that you will only spend \$23,000,000 and get the water in five years? No, we are investing our money in land where there is water. We read your Los Angeles newspapers and they say that you haven't enough water to keep your city going."

**Most Dastardly Scheme**  
"Now, that is what I get when I talk to eastern capitalists. You can't believe that the city is in such a water supply in Southern California because the Owens river boomers have persistently declared that the city is 'up against it.' I know that there is plenty of water here and so do other men who have investigated the great natural reservoir in this plain. I consider this Owens river scheme the most dastardly ever conceived. In order to get the people to vote for the bonds they have been solemnly assured the welfare of the city is at stake; that if we don't get the Owens river water the city will face a water famine."

**What are the facts?** Lippincott and Eaton testified in the Pomery-Hooker suit just what the conditions are, and Mulholland corroborated their testimony by his evidence as to the flood waters. When you bring that argument up now, the boomers exclaim: 'Mulholland did not know that the city would grow so fast.' If Mulholland did not know that the city would grow then he is not fit to be superintendent of our water system. He ought to get out and another man put in who can look ahead."

"I say, and my record entitles me to credence, that there is no danger of a shortage of water. There is not only plenty of water in the great natural reservoir on which this city is built, but it can always be kept full by conserving the water that goes to waste every winter. I back every one down I talk to about the Owens river, and they know about it is what the subsidized Times says. What's the use of warning people against the Owens river? I am in that frame of mind that I feel like selling my property and getting out because I see what we are going to run our heads against."

**Year of Investigation Needed**  
"If I had been mayor of the city of Los Angeles, would I have endorsed the Owens river scheme after a ten day's investigation? No, sir, I would have waited a competent engineer on it and given him a year to make his investigation. What would Dockweiler's report have been worth after a personally conducted tour of ten days? About as much as the Stearns-Fremont report, made after an eight days' trip.

"I want to tell the mayor that if the Owens river water is brought to the San Fernando valley it will be a color of blood. I want to tell him that I built reservoirs in the Antelope valley and they would not hold water. I want to tell him that the Halverson reservoir would not hold water. You've got to get an alkali bed. The water in the Owens will be a second Owens lake. If the water of Owens river was pure and the stream from the increasing flow when they emptied into the river, then the Owens lake would be pure. It is not and the answer is that it has an alkali bed. Then why won't Halverson become an alkali bed? What's the use of this? This city of no water has frightened off investors and has injured the city to an immeasurable extent."

## GEORGE MASON'S PROTEST

FORMER POLICE COMMISSIONER AND TAXPAYER THINKS IT IS ABSOLUTELY POOR BUSINESS TO MORTGAGE THE CITY TO ITS LIMIT FOR OWENS RIVER FOLLY

Let this era of graft and expensive construction pass before undertaking a colossal work of this kind. If it has real merit it will surely keep until it can be undertaken in a businesslike way. It is worse than folly to begin to put up more than \$1,000,000 of extra interest per annum for ten to fifteen years before needed, if at all. That is being entirely too free with the other fellow's stuff.—From Statement of George Mason to The Evening News.

LOS ANGELES, May 31.—To the editor: This is a great and growing city, and all of its needs must be supplied as they present themselves, and no resident of Los Angeles is more anxious than I am that the city shall be properly supplied. The water question is soon to be passed on, and in our time people may vote to pay several times the proper cost for any of these things now. It is absolutely poor business to mortgage the city to the limit of credit and then turn the money over to a system of management that has never at any time in the last twenty years properly applied fifty cents on the dollar of the money collected from the people. It is not yet known how much water the Owens river will furnish for us. It seems to be a second mortgage proposition at best, as shown by the city attorney.

After others who have prior rights get what they want we get what is left. These things are asked to mortgage ourselves all we can at the present time and put ourselves in a position so we will have to do it again soon, at all. That is being entirely too free with the other fellow's stuff. This great city of Los Angeles never should be asked to play second fiddle to anything whatever. There are those who honestly believe that if the bonds are not voted that real estate will be lower in price. So it will, but it will be lower in price than it is now. The bonds carry it will be still lower. Voting the bonds will not help any man who has real estate to sell. On the other hand, there are many who believe, with me, that to bond from five to fifteen years ahead of actual need and to run into extravagant expenses under the present plan is little short of a crime.

But the boomers shout, "We must have water!" That people are coming here in large numbers. It is true that we are asked to mortgage the city to the limit of credit and then turn the money over to a system of management that has never at any time in the last twenty years properly applied fifty cents on the dollar of the money collected from the people. It is not yet known how much water the Owens river will furnish for us. It seems to be a second mortgage proposition at best, as shown by the city attorney.

There are a few things that I would like to know, as follows: What is the total length of this waterway, from the intake point to the city, and where does it empty? What is its size and how is it to be constructed? How much tunnel and how much at-siphon? If a failure comes in the management how is the error to be corrected? Will it be another experiment? Is there any responsibility anywhere if so, where is it?

I have been perfectly willing to leave this to the people to vote as they see fit, but a gang of boomers, who seem to believe that the way to get the value of property is to put a mortgage on it, have opened a campaign and are spending somebody's money in favor of the mortgage. For more than thirty years I have been in the banking and loaning business, and while I have never known any man to increase value by mortgaging his property, I have met plenty of them who thought that could.

## BOOMERS BULLDOZE POLICE

Chief Kern Orders Members of Force to Work for Desert Water Bonds

In direct contravention of the spirit of the rules of civil service is an order issued to the members of the police department yesterday by Chief of Police Kern. This order sets forth that the questions of advisability and feasibility of the Owens river project "have been considered by the present administration and the one preceding it; the best counsel, technical and legal, that could be had, has been received by the responsible officials of the city. The officials, without dissent, have determined that this plan is necessary and entirely feasible." The order further states that "it is the wish of the mayor, Mayor Harper, that all of the officers of this department not only shall vote for the carrying of the bonds, but shall actively engage their friends in the matter." In conclusion, the order which is signed by Chief Kern, says: "I earnestly urge all officers to bear the matter constantly in mind until the time of the election, and to lose no opportunity of furthering the project. The greater the majority in favor of the bonds the higher will be the credit of the city and the consequent advantages in disposing of the bonds."

## Wasting 800 Inches Daily

From actual measurements taken at the outlet sewer from the city sewer pumping from the tunnel 800 miner's inches of water. This started with a flow of 40 inches and has been growing steadily larger. For more than a year, day and night, the flow has been pumped in a clear, cold, sparkling stream, with no sign of diminution. In order to increase the increasing flow additional pumps were put in until today 800 inches of good water are going to waste in the city sewer. Los Angeles city consumes 2,100 miner's inches, and according to Water Engineer Mulholland, the supply is giving out. In fact, he is hard pressed to find water to keep the city from overflowing. The water which is going to waste at the outlet sewer is taken from a great water plane supplied from the Los Angeles river. Mulholland made no comment when he saw 400 inches being pumped from the sewer, on a recent trip trip with the mayor and the board of public works to inspect the tunnel work.

"Mulholland has a practical illustration of the fallacy of his declaration that there is no available supply of water in this locality," said one man who had seen the waste, "in the great amount of water being lost at the outlet sewer. These pumps have been operated day and night for a year and instead of lowering the water plane it has been found necessary to put in more pumps, the result being that today 800 miner's inches are being lifted from the ninety-foot level."

"If Mulholland really wanted to take water to be found right around Los Angeles, he could find a way to use these 800 inches. On this point, he shuts up like a clam."

were extremely light, although some of the ladies, contrary to the suggestion that they pay the expenses of their booths, had charged them up.

Heights Congregational Church, also courtroom through five days of the trial, had sunk to a dull monotone. He

was to the uses of the architects, and to cost about \$50,000, is planned. The meeting unanimously approved the voting of Owens River water bonds today.

The first session of the annual convention is to convene at 10 o'clock.

# Free Excursions Every 20 Minutes Every Day. See for Yourself, Everybody Welcome

FREE ROUND TRIP TICKETS From Los Angeles to Redondo and Return, on Cars Going Every 20 Minutes, Every Day, Are Given Away at Our Office Absolutely Free Upon Application. Also Free Automobile Ride at Redondo

## THE BEAUTIFUL "Redondo Villa Tract B" THE BEAUTIFUL

Only \$90 Per Lot \$4 Down, \$4 Per Month No Interest, No Taxes

### Dirt Is Flying, Rails Are Being Laid, Spikes Are Being Driven. Join the Rush to Redondo

level lots, 50x150 feet. Rich Soil, Pure Water, Fine Climate. All lots, including corners, one price—\$90 per lot—no more, no less. You know what you have to pay—\$90 per lot—no higher. At Redondo over \$2,000,000 has already been expended in grand and substantial improvements. The beautiful "Redondo Villa Tract B" is on the Camino Real (King's Highway) Boulevard, connecting Redondo with Los Angeles. We have just begun this beautiful tract for \$151,000, and believing in the principle that it pays to let customers make a profit, hence we have decided on this grand profit-sharing plan. We have just begun this beautiful tract for \$151,000, and believing in the principle that it pays to let customers make a profit, hence we have decided on this grand profit-sharing plan.

Mr. H. H. HUNTINGTON IS EXPENDING OVER A MILLION DOLLARS AROUND REDONDO IN SUBSTANTIAL IMPROVEMENTS. On down to Redondo and see for yourself. At Jefferson street and Grand avenue see the immense stacks of heavy steel rails for the double-tracking of the present two electric lines of the Los Angeles and Redondo Railway Company. The rails are arriving daily. Dirt is now flying. Then there's the Los Angeles-Pacific Railway Co.'s electric line to Redondo, the broad-gauging of which will soon occur. And in addition to the above three electric lines now running to Redondo is the great Santa Fe steam railroad. With four lines of transportation it would seem as if same would be sufficient, but surveys are in the field laying out the shortest line of all to connect Los Angeles with its choicest seashore suburb—Redondo. Mr. Huntington is now building at Redondo the largest electric power house on the Pacific coast, to cost \$1,250,000, as fast as men and money can do it. Go down and look at the mammoth cement smelterstack. A suburban electric railroad is now nearing completion at Redondo. The grand three-story business block of Mr. W. M. Garland at Redondo is just finished. Follow successful men like Mr. Huntington and Mr. Garland—they know that Redondo is a wonderful and a safe place to invest in. Buy anywhere around Redondo and you are sure to make large profits. Three commercial wharves. A safe harbor by twenty years' practical test. Redondo is permanent and has just begun to grow. Then again, referring to Mr. Edwin Chambers, the far-sighted General Freight Agent of the Santa Fe; Mr. George E. Peck, the successful banker of San Pedro; Mr. John J. Byrne, the capable General Passenger Agent of the Santa Fe, and Dan Murphy, the millionaire oil operator of Los Angeles. A word to the wise is sufficient. BUY!

Remember that your purchase is made with the distinct understanding that we will send all money paid us, with 6 per cent per annum interest added, if, after visiting "Redondo Villa Tract B" it is found that we have misrepresented our proposition in the slightest particular.

### 25 Per Cent Guaranteed Increase

Buy down and \$4 per month until paid for we sell you a "Redondo Villa Tract B" lot, subject to the following guarantee from us: If at the expiration of one year from purchase this \$90 lot is not worth \$112.50—or 25 per cent increase—based on the price at which our corps of salesmen will then be selling similar lots, we will refund to you the \$4 per month interest additional. If you should sell the lot at any time before payments have been completed, we will give to you a cash refund of the lot without further cost. If you should lose employment or be sick or be forced to leave the land, but as each written certificate of sickness or non-employment is received monthly your time for payment will be extended another month.

### Our Restrictions

no shanties, no factories. Purchasers are not permitted to build, but if they do then they must erect attractive looking buildings. Buy an acre where values will double in a year and treble in two. Come in today or any day this week and get a plot of Redondo, and see out in your free car and see what I offer for \$650 and up. PAY TWENTY DOLLARS DOWN AND BE YOUR OWN LANDLORD.

Buy an acre where values will double in a year and treble in two. Come in today or any day this week and get a plot of Redondo, and see out in your free car and see what I offer for \$650 and up.

COME ONE! COME ALL! Office Open Every Night During Week Days From 7 to 9 P. M. to Accommodate Those Who Cannot Come During the Day.

## Los Angeles Securities Co. 124 South Broadway

Incorporated under the laws of the State of California

Los Angeles, California

The Grand Million Dollar Hotel and Tropical Gardens at Redondo

Free car tickets to Redondo furnished all interested. Electric cars leave every twenty minutes. Get your free tickets at our office in advance. Automobiles will carry you around Redondo and to the beautiful "Redondo Villa Tract B." GRAND SUCCESS OF THE SEASON—Everybody delighted. The golden spike of the Redondo Villa railroad was driven Jan. 6—the commencement of great transportation facilities for the Redondo Villa Tract. The roadbed has been graded, ties are on the ground, rails will soon be laid.

### TITLE GUARANTEED ABSOLUTELY PERFECT

The 604 acres of the Rancho Sausal Redondo, embraced in the "Redondo Villa Tract B," was purchased by us from George E. Peck, president of the Bank of San Pedro, for \$151,000. It is protected by an Unlimited Certificate of Title and all deeds to purchasers of lots in the "Redondo Villa Tract B" will be Warranty Deeds, which is an assurance that every purchaser in the "Redondo Villa Tract B" will receive an absolutely perfect deed.

### BE ON HAND EARLY—COME AT ONCE

This sale of large, level lots, 50x150 feet in size, for only \$90, in payments of \$4 down, \$4 month—no interest, no taxes—is unparalleled. Remember that the "Redondo Villa Tract B" has the advantage of having no city taxes to pay.

BUY WHERE THE AIR IS PURE OZONE FROM OFF THE HEALTH-RESTORING WATERS OF THE PACIFIC. Buy where the soil is rich and infertile frosts never prevail. Buy around Redondo, where there are three electric lines and one steam railroad, and there will soon be another electric line. Buy where the purest of water, from the large water works now on the tract, can be had for only 7 1/2 cents per thousand gallons for irrigation. Buy where you will make large profits. Buy at the opening sale, which has been the history, invariably insures a great profit. If you can't be on hand at the office tomorrow morning, then telephone (Main 3375 or Home 5533), telegraph or write at once, and a beautiful illustrated prospectus, map and sample contract will be mailed to you absolutely free.

### USE THIS FORM—A POSTAL CARD WILL DO.

## RULES ARE NO JOKE

Harvard School Boys Expelled  
for High Jinks Held at  
Levy's Cafe

## NO DRINKING OR TOBACCO

Professor Emery Says He Will  
Be Obedied If He Has to  
Sell Property

Sixty boys, members of the Junior and senior classes at Harvard Military school, discovered to their sorrow yesterday that the school rule prohibiting smoking and the use of intoxicants was to be enforced, even if it compelled the breaking up of the celebrated school, and the selling of the costly property for town lots. Several were expelled and others were suspended yesterday by Prof. Emery for acting as the ringleaders in a smoking, drinking and hawking bout at Levy's cafe Friday night when the junior class entertained the seniors at a banquet.

Perhaps the most punishment, that is, the punishment that concerned the majority, was Prof. Emery's order halting the arrangements and plans for the annual class dinner, the exercises and exhibition drill scheduled for the commencement exercises which were to be held Wednesday, Thursday and Friday of next week. Instead of the usual yearly dance and other festivities, the boys will be compelled to continue the grind of studies and routine drill until the closing minutes of the school year. Their diplomas may be taken from them as a final, though forcible reminder that the "No smoking, no liquor" rule goes into school and out, so long as the boys are attendants of the military school. However, Prof. Emery is not inclined to withhold the diplomas. He said today they would be mailed to the homes of the boys.

"I have not settled this affair as yet," said the professor. "I do not desire to say what other punishment I intend to inflict on the boys, but it will be sufficient to teach them that my rules are not to be trifled with. If I cannot conduct this school, they cannot do it for me, and I am going to carry out my advertised and verbal promise to the public and to the parents and guardians of these boys that they shall not smoke while in my charge. This property is valuable and my word is as good as valuable to me that I will cut these grounds up into town lots and sell them before I will countenance the violation of one of my rules concerning smoking and the use of liquor. I am not a crank on the use of tobacco. One of the reasons of the world uses tobacco. But I do not believe that boys should use it until they have reached their majority. They have had their fun and now they must pay the fiddler."

Professor Emery knew all about the high jinks of the seniors and juniors before they appeared at their classes yesterday morning. He did not inform the boys of the source of this information and they are in the mood to mob the spy. When several of their number were expelled and others suspended, the boys realized the seriousness of their prank in cutting the hair of one of their number after they had encouraged their mischievous spirit by smoking cigarettes and drinking wine.

## BREAD BEFORE BUNCOMBE!

Man's First Duty Is to His Family. Why vote yourself overwhelmingly in debt that big-salaried officials may be continued in office, and millionaire newspapers wax still richer at the expense of the taxpayer? This is what will happen if the alkali bonds carry. Vote No, strong!

## Of Social Interest

One of the prettiest home weddings of the season will be that solemnized this evening when Miss Lillian McLaughlin, daughter of Mr. and Mrs. C. A. McLaughlin of 1298 Arapahoe street, and Mr. Royal Mattison Booth are married. Rev. William Horace Day will officiate at the ceremony, which will be witnessed by relatives and a few intimate friends. Mrs. J. J. Tunnicliffe, Jr., of Galesburg, Ill., sister of the bride, will be mistress of the wedding march from "Lohengrin." Mrs. Ethel West and Miss Elizabeth Arnold of Galesburg, a cousin of the bride, will be bridesmaids. The wedding music will be rendered by Mrs. George A. Crandall, who will sing "Sweetheart" and "The Evening Star" from Tannhauser. Miss Myrtle Outlet, a talented harpist, who recently came to Los Angeles from the east, will play the wedding march. The house will be artistically decorated for the occasion with a profusion of flowers and greenery. Fine white sweet peas and ferns will be used in the arrangement. After the ceremony a large reception will be held for about two hundred friends. Mr. and Mrs. Booth will enjoy a honeymoon trip to Honolulu. Upon their return they will make their home in Los Angeles, where Mr. Booth is engaged in business as a member of the firm of Booth & Marx, hardware dealers. He is a son of Mrs. L. M. Booth of 1300 Magnolia avenue, and is a grandson of the late Seth Mattison, a former well known citizen. Miss McLaughlin is a member of the Delta Delta Delta sorority of Knox college, which she attended for two years in the musical department. Both she and Mr. Booth are popular in the younger society set of Los Angeles.

Misses Hazel and Lucy Sherman, daughters of General and Mrs. M. H. Sherman, are visiting in Los Angeles from San Francisco, and are house guests of their cousins, Misses Lucy, Mary and Katherine Clark of 9 St. James park. The Misses Sherman, who are popular in exclusive society circles of the north, visited here last year and were much feted. A number of delightful affairs are planned in their honor during their present stay in Los Angeles. Tomorrow afternoon the Misses Clark will give a luncheon for them and in the evening Miss Clara Vickers of West Twenty-ninth street will entertain them at an informal dinner party. Thursday afternoon Mrs. Gwendolen Laughlin will be hostess at a theater party given in compliment to the visiting young women.

In compliment to Mrs. Joseph A. Clark and Mrs. Marcus Daly, who are visiting in Los Angeles as guests of their sister, Mrs. J. Rosa Clark, a number of delightful informal affairs are being given. This afternoon Mrs. Stephen C. Hubbell of Arapahoe street and her daughter, Mrs. W. P. Jeffries, gave a large luncheon at the California club in their honor and also in compliment to Mrs. Cosmo Morgan, sr., who is a visitor in the city. Covers were laid for seventy-five guests. Tomorrow afternoon Mrs. J. Rosa Clark will entertain in honor of her sisters with a tea for a number of her friends.

Miss Zella Sackett, daughter of Mr. and Mrs. H. D. Sackett of Hollywood, and Mr. George Howard Dunlop, mayor of Hollywood, will be quietly married this evening at the home of the bride's parents at Pasadena. Rev. M. L. Yager will officiate and Miss Katherine Saunders will be maid of honor. Mr. Robert Willis will serve as best man. The house will be artistically decorated for the ceremony, which will be witnessed by relatives and friends. After a wedding trip Mr. and Mrs. Dunlop will make their home in Hollywood.

Cards have been issued for a dancing party to be given Friday evening, June 11, at Kramer's hall, by Mrs. G. Alexander Bobrick in honor of her daughter and son, Miss Marie Bobrick and Mr. Arthur Bobrick. The latter, who has just completed his high school course, will later enter Harvard or another of the eastern universities. About 200 invitations have been issued for the dance.

At a quiet home ceremony yesterday Miss Elizabeth Kelsey Berriman of Indiana and Mr. Adolf Schleicher, also of Indiana, were married in their new home at Pasadena. Rev. E. H. Wood officiated and Mr. Samuel G. Wood served as best man. The young bride recently arrived from the east, accompanied by Mr. Schleicher's mother.

Miss Mildred Merrifield of San Luis Obispo and Mr. Robert C. Clappitt of Los Angeles were quietly married last evening at the home of Rev. Baker P. Lee. Miss Clara Little was maid of honor and Mr. Sam Eastman served as best man.

Mr. and Mrs. John A. Pirle of 1819 South Union avenue announce the engagement of their daughter, Miss Elizabeth Grace Pirle, to Mr. Frank Sutherland Hutton, a young attorney. The wedding will take place in September.

Members of the senior class of the Girls' Collegiate school will hold their graduation exercises this evening in the Ebell club house, Eighteenth and Figueroa streets.

Announcement is made by Mr. and Mrs. Lawrence Eley of the engagement of their niece, Miss Madeline Black, to Mr. Alvin Mills. The wedding will not take place until September.

Mr. and Mrs. George J. Birkel of 1128 West Twenty-first street are entertaining as guests Mr. and Mrs. Harry J. Maxwell of San Francisco.

This evening the Beta chapter of the Lambda Theta Phi sorority will give a dancing party at Kramer's hall.

Of the society affairs planned for the week, one of the most enjoyable in which the members of the younger set will participate will be the dancing party which Miss Juana Creighton of

## Manufacturer's Sample Sale Of Hand Bags and Purses On Sale at Half or Near It

Look at this picture of hand bags. Note the variety of styles, and the word "samples" will have more significance to you. The pictures were drawn at random from a lot that contains close on to a thousand of the very finest hand bags and purses that were ever brought to Los Angeles to sell at anywhere near such price. Broadway buying prestige scores here because it's only houses of great buying capacity that are given an insight into deals of this kind by the manufacturer. Most every style and shape you can think of, mostly every leather, including the very finest walrus, seal and alligator. Everything from the smallest envelope purse to the largest traveling bag. An assortment that makes a complete stock in itself, at regular prices that range from \$2.50 to \$30.00, all grouped into five lots for convenient choosing to sell at \$1.48, \$1.98, \$2.50, \$3.50 and \$5.00.

Lot 1 at \$1.48 CONTAINS \$2.50 TO \$3.00 VALUES Lot 2 at \$1.98 CONTAINS \$3.50 TO \$4.00 BAGS Lot 3 at \$2.50 CONTAINS \$4.50 TO \$6.00 BAGS Lot 4 at \$3.50 CONTAINS \$6.00 TO \$9.00 BAGS Lot 5 at \$5.00 CONTAINS \$9.00 TO \$10.00 BAGS

## Irish Linen Suiting, Regular 20c Kind at 15c

This is a cotton summer suiting, so cleverly does it imitate linen that even the experts can't tell it. Light and dark grounds, colored and black checks and stripes. 36 inches wide. A 20c value at 15c yard; third floor, Wednesday.

## French Batiste 19c

40 INCHES WIDE

A sheer quality French batiste in large color spots, rings, plaids, checks, and small polka dots. You'll like it for full suits, skirts, and shirt waists. Buy it Wednesday on the third floor at 19c yard.

## 15c Floral Organdies 10c

Light and dark grounds in a 36-inch width. Large and small patterns. Color combinations you'll like. 15c value at 10c.

## 20c Swiss 15c

White dotted swiss, large, medium and small dots. Firmly woven dots that will not wash out. 20c value 15c Wednesday; third floor.

## 12 Yards English Long Cloth \$2.39

IT'S WORTH 25c YARD. 36 INCHES WIDE

English long cloth, soft finish for women's under garments. This price is less than the wholesale price today. Bolt of 12 yards for \$2.39 for a Wednesday sale; third floor.

## TEACHERS GET A RAISE

Board of Education Provides

for Twelve Payments a Year

Instead of Ten

By providing for twelve payments a year instead of ten, an increase of twenty per cent will be made in the salaries of school teachers, superintendents, employees of the school board and janitors. The report of the committee of the whole presented to the board of education at its meeting last night, but the fly in the ointment was the lack of money in the treasury. Chairman Frank of the finance committee said a plan must be devised by which the twelve payments can be made from next year's funds as there is not a dollar on hand to meet the expense.

Secretary Averill reported, when the subject came up to begin the monthly payments with the vacation months, that his experience has been that from fifty to seventy persons chosen as teachers have resigned before the opening of schools at the termination of vacation. It did not look like business to pay teachers for services not actually performed. The plan finally hit upon was that the first and sixth payments be made at the close of the first term of school, and the eleventh and twelfth payments at the close of the second term. This applies only to teachers and does not interfere with the regular payment of salaries to office employees and others paid by the calendar month. The pay of all laborers was increased twenty-five cents a day to \$2.50 and includes car fare.

More than 1,100 teachers will be employed in the schools the coming school year of 1907. There has been a gain of 4,639 children of school age over the census of last year.

## TOMORROW IS WOMEN'S DAY

Jonathan Club Throws Open Its Doors

to Fair Friends of Members

Tomorrow will be women's day at the Jonathan club. Between the hours of 4 and 11 p. m. the ninth floor and roof garden in the Huntington building will be open to the fair guests of members. During July the women's annex of the club will be closed for renovation. All outstanding membership cards will be canceled July 1 and August 1. New cards will be issued to the women of members' families only.

Taxpayers, don't be deceived! If you help elect the old brick bond it will be a sorry day for your future peace of mind and pocketbook.

5 S. BROADWAY

Los Angeles Times

WEDNESDAY MORNING, JUNE 12, 1907.

LET'S CAT OUT

IN LOVE FEAST.

Mrs. Horton Says Mrs. Giese

Started the Row.

Animal Friends' Auxiliary

Hears the Story.

Handsome Sum Is Raised for

the Rescue Home.

The cat was let out of the bag yesterday in the famous cat-and-dog time that resulted from the brilliant garden fete given by Mrs. Rufus L. Horton for the benefit of the rescue home for suffering and homeless cats and dogs and horses and other animals that need the touch of a friendly hand and the sound of a voice that is kind.

Mrs. Horton pointed the finger of accusation yesterday at the woman who is said to be responsible for all the mean things that have been said in the last ten days at El Monte. The handsome sum raised at the garden party—about \$1500—has been placed in the bank to the credit of the rescue home that the Society for the Prevention of Cruelty to Animals plans to build.

Amicable relations are being restored between the two factions that, while maybe not delighted in scratching and biting, have been in a bellicose frame of mind ever since this lamentable dispute arose.

Mrs. Horton spoke right out and said she had discovered Mrs. L. E. Giese to have been the cause of all the trouble. She said she wished she could tell Mrs. Giese to her face. But Mrs. Giese was absent, so somebody had to tell her by telephone.

HATCHET BURIED.

The hatchet was buried at the annual meeting of the Woman's Auxiliary of the S.P.C.A. at which Mrs. Horton appeared in company with Mrs. Mary Babcock and made a detailed statement of the receipts and expenditures in connection with the fete.

It was the story of probably the "most successful benefit ever engineered by one individual in a good cause, and Mrs. Horton was not only applauded for her remarkable success, but was congratulated upon her frankness in going to the root of the difficulty that sprang up and in a measure dimmed the glory of the affair.

For more than an hour, fifteen ladies of the auxiliary had been engaged in a mute and inglorious contest with a full-grown pipe organ in Birkel Hall on South Spring street, endeavoring to elect officers and conduct other business while a music teacher was giving a lesson to a pupil. Mrs. W. J. Varie, president of the auxiliary, was in the chair, and the rest of the valiant little band of animal friends were grouped closely around her so they could hear and be heard.

Just about the time one of the members would reach a particularly interesting point in her talk, the pipe organ, in the rear of the hall, would pipe a lay and the talk would cease until the heavy bass notes stopped reverberating.

But the lesson lasted only an hour, so the afternoon was not ENTIRELY lost.

The election resulted in the choice of Mrs. Varie, by acclamation, to serve for another year as president. Mrs. Percy Wilson was elected vice-president, Mrs. E. B. Crowder, secretary, and Mrs. Wilhelmina Ames, treasurer.

MRS. HORTON APPEARS.

This business over, the ladies were discussing the matter of a water supply for thirty animals during the summer, when Mrs. Horton and Mrs. Babcock appeared.

As the fuss and feathers was supposed to have been between the S.P.C.A. and the auxiliary, and Mrs. Horton was on the other side and her supporters on the other, it was only natural to expect that there would be a display of feeling. But there wasn't.

Mrs. Horton asked the ladies for their attention and then went right into the merits of the case.

"Mrs. Giese was at the bottom of this whole thing," she said. "She caused all the trouble. She became offended because she could not dictate in some matters and she vented her spite by creating this commotion."

"Who was it that demanded Mrs. Horton, glancing into the faces of her auditors, 'who went about to the different ladies in charge of the booths at the garden fete and told them not to turn their receipts over to me?'"

"No one answered, but if there is such a thing as a visible thought, several of them were in evidence."

"You know, Mrs. Horton, what I told you about Mrs. Giese," put in Mrs. A. W. Remitt, becomingly clad in brown.

THREATENS TO KNOCK.

"Mrs. Giese told me," went on Mrs. Horton, "that if I put Mrs. Remitt in charge of the press work, she (Mrs. Giese) would work against the success of the fete."

"Why, Mrs. Giese, when she was out soliciting donations for the benefit of the affair, told merchants she would take anything, even a ten-cent tack hammer. Other ladies were getting articles worth forty or fifty dollars."

"Well, if Mrs. Giese is going to run this auxiliary in the future as she has tried to run it in the past, I am going to resign," spoke up one of the members.

"Some one called me up on the telephone," Mrs. Horton said, "and asked me if I intended to start another prevention of cruelty society. She said she wanted to join."

"Oh, I know you, Mrs. Giese," I answered, and I hung up the telephone."

Horton explained the change in the wording of some of the window cards by saying that the words "Rescue Home" were substituted at the suggestion of the printer, because of their more direct meaning. There was no intention at any time to slight the Society for the Prevention of Cruelty to Animals.

PINE START FOR HOME.

Mrs. Babcock, who was called upon by Mrs. Horton to read the financial report of the fete, stated that \$1525.33 had been placed in the bank to the account of the animal rescue home and its auxiliary. Other returns that are to come will swell the amount to considerably more than \$1500. Some of the individual booths turned in as much as \$150 apiece.

The expenses were extremely light, although some of the ladies, contrary to the suggestion that they pay the expenses of their booths, had charged them up.

The affair was shown to be a tremendous success.

"I want to say a final word," said Mrs. Horton, after the auxiliary extended a vote of thanks to her and the ladies who had helped her. "That is that I stand up firmly for Miss Helen Mathewson, who has been one of my best helpers in this undertaking. I have attempted nothing of this kind again. Miss Mathewson will be at my right hand."

This was for the benefit of the strong S.P.C.A. supporters who have taken sides against Miss Mathewson because of her open fight on Superintendent Zimmer's society.

With the pipe organ and all, it was a very delightful afternoon.

TIES NOW TIE

COVINA TO U.S.

LAST GAP IS CLOSED IN THE NEW

TROLLEY LINE.

Crossing of Southern Pacific Tracks

at El Monte Completed. R.R. and All

Laid, and Plans Contemplate the

inauguration of Service by the

First Day of Next Month.

With the installation yesterday of the crossing of the Pacific Electric and Southern Pacific lines at El Monte, Los Angeles and Covina now are linked by the electric line, the building of the electric line that has been in prospect for about six years will soon be completed. Cars will run between Los Angeles and Covina. It is promised, by July 1. A part of the line, from Los Angeles to Ramona, across, will be opened next Sunday.

A gang of men yesterday placed in position the steel crossing over the tracks of the Southern Pacific at El Monte, thus filling the last gap in the continuous electric road between this city and Covina, twenty-one and one-half miles distant.

Covina is making preparations to observe the entry of the first electric cars, which, if present plans do not miscarry, will be on July 1. The arrival of the car will signalize the completion of a work which the people here have been waiting for since 1901, when the movement was started to secure a right of way for the electric line.

Fifty thousand dollars was contributed by the people of Covina to adjacent territory to pay for the necessary right of way, which is ample for four tracks, and which extends from El Monte to a point two miles east of Covina.

Two tracks have been laid from Los Angeles to Ramona, and from there through El Monte to Vineland, or Baldwin Park, one track so far has been laid. From Baldwin Park to Covina the line is double-tracked. With the exception of the line between Ramona and El Monte, the line is practically completed.

In many ways this newest line of the Huntington system is the most remarkable of all. For its entire length it runs over a private right of way, and there are only three curves of any consequence between here and Covina, a factor that will make for rapid time. It is expected that the local trains will make the run in three-quarters of an hour, while the "flyers" will make it in thirty-five minutes.

The track is laid with eighty-pound steel, and the trolley wire is the heaviest in use anywhere.

The principal reason for this extreme care to make the line substantial is that it is the preliminary stretch of the road that eventually will connect Los Angeles and Riverside.

Leaving Los Angeles, this new line follows the route of the old San Gabriel Valley Railroad Company from a point on Aliso street, just east of the river, thence over the route of this one-time "jerkwater" to Ramona, and then on in almost a straight line to Covina.

NEGRO BANKER'S VISIT.

His Concern Aided Proud Whites of

Richmond in Panic When Their

Own Kind Would Not.

Rev. W. L. Taylor, a negro preacher who is at Los Angeles on his tour of the South, who went to the financial assistance of that city when the white bankers would not take the risk, is spending a few days in Los Angeles. He is the grand worthy master of the Grand Fountain of the United Order of True Reformers, a fraternal organization of negroes, that is particularly strong in the South, with a considerable membership on the Pacific Coast.

Taylor's bank was a growing institution in Richmond when the panic of 1893 came on. Money became very tight. Loans were hard to obtain, even on the best of security. The city felt the pressure. It was hard pressed for funds. Thirty thousand dollars was needed to pay school teachers. The banks would not advance the money; they were not of the banks conducted by white financiers.

Then it was that this bank conducted by negroes sprang into the bank. It may have been rather humiliating to the proud Southerners to accept assistance from men who once had been slaves, or were that some slaves, but they needed the money, and they gladly took the loan. The bank became celebrated throughout the country on this account. The money was paid back in the course of time.

Accompanying Mr. Taylor is Rev. William Anderson, another officer in the organization. Both men have received a warm welcome from Los Angeles negroes. They speak nearly every night at some church.

Mr. Taylor is pastor of Jerusalem Baptist Church at Doswell, Va., near Richmond, and has a large congregation. In addition to his duties as president of the True Reformers, he holds a similar position with a bank and a building and loan association connected with the order. He is one of the wealthiest negroes of the South. Thirty-four years of his life have been spent in the ministry.

CONGREGATIONAL BANQUET.

Members and friends of the City Congregational Church, which last night in the Park Congregational Church, Temple and Metcalf streets, E. B. Clark, president of the union, was chairman of the evening. The address of welcome was made by Rev. John H. Cooper, pastor, and this was followed by Rev. David Beaton, who gave the invocation. The subject of the church to social, civic and religious problems. He says the church of the future must adapt their methods to render greater service along the lines of modern social and municipal questions. Rev. Stanley R. Fisher, pastor of the Arlington Heights Congregational Church, also spoke. One hundred and fifty were present. These banquets are held every two months.

FIERCE STORY

UNDER OATH.

Strong Man's Helplessness

Made Vivid.

Garrett's Dramatic Chapter

of Day of Strife.

Accuses Inglewood Water

Company Men.

Always dramatic in his manner of testifying in the action he has brought to recover nearly half a million dollars and his place as a director of the company he founded, Louis R. Garrett yesterday became intense. He was telling a story, on the lines of his complaint, of a deal in which the alleged schemers attacked every center of emotion that exists in man to compel him to do their will.

In the recital of the witness Harry Lee Martin played the role of chief trolleur, pleasantly merciless, always polite, but insistently pointing out to Garrett his utter helplessness and telling him what he must do.

The gathering in the law office of Rosa T. Hickox, consisting of Hickox, Garrett and R. L. Martin, had discussed general affairs of the company. The witness continued:

"Then Martin said: 'There is another little matter we want to take up with you, and that is the title of the residence property in Inglewood. Where does it lie?' I told him it was vested in the Inglewood Water Company."

"Martin said: 'There is another matter we want to take up. We don't have you ever paid \$100,000 for the land now held by the Inglewood Water Company and we think you are not entitled to any of that stock. We don't think you paid anything for it. We paid for that property, or we've got to pay Freeman, and we want that stock. Do you refuse to treat with us?' I told him I did not know."

"Then he said again: 'There is another little matter we are going to take up. There is that quit-claim deed from Freeman, signed July 2, 1903, for lot 110 and some personal property, with the interpolated paragraph conveying all right and title to the ranch and townsite to the Inglewood Water Company. Freeman says that paragraph was forged.'"

"I told him I had secured about all the land in Inglewood before that. Perhaps I had got a broader clause into that deed than should have been there. Freeman knew that it was to be written in, and consented to it. I never thought of any one accusing me of interpolating that clause after the execution of the deed."

"Martin said: 'Freeman is here making claim for pay for that property, and he's got to be paid. Anyway, we're going to pay him. I told him that deed did not give anything I didn't have already, since it was only a quit-claim to clear up a doubtful title. It was not a deed. It was a transfer of the deed without that clause, after it was executed. You know I make a good witness. I have a good memory. I think this is a matter for your serious consideration.'"

HIS NOSTRILS WIDEN.

The form in the witness chair stiffened a little. The witness's eyes opened a little wider and his nostrils widened. His manner, so far, had been that of a man who is a witness, and he felt the drag and suck of the undertow. Presently, he resumed:

"I told them that if they thought they had any claims against me the right thing would be for them to bring a civil action. I told Martin that he might as well bring a civil action against the company. And Martin said he never would."

"Martin said: 'We feel justified in taking every advantage we can of you.' And Hickox said: 'If we let you leave this office you might transfer that stock before we could get any civil action started.'"

"I offered to put all the stock in escrow and give security for the amount of all the claims they thought they had against me. They refused. The witness drew his breath sharply, as if physical bonds were enwrapping and smothering him."

"Martin said, went on the witness, repeating the phrase as if it were a death knell ringing in his head—'Martin said: 'We are going to fight you in every way, by any means, if you do not transfer your stock to us, and give us your note for \$10,000.'"

"What will I have left?' I asked then, and Hickox said: 'Your family and your business. There are a lot of men that have no more than that.'"

"Martin said: 'Measure is chairman of the Bar Association. We will have you disbarred if you do not transfer that stock. Your fortune is on paper, and in many different things. You can't keep it up if people come down on you. If that complaint is filed at 4 o'clock you are ruined, for you know you can't afford to have this charge against you. Even if you should win in the trial, and all the civil suits, you would come out of it a ruined man.'"

The tremendous voice of the witness, which has echoed through the courtroom through five days of the trial, had sunk to a dull monotone. He

THE TIMES' SIREN WILL BLOW.

Keep your ears alert for the message of The Times siren whistle after the bond election this evening.

When the returns are in, The Times siren will announce the result to Los Angeles. First, a long blast to call attention. Then the ratio of "ayes" to "noes." For example, if the bonds are approved by a vote of 30 to 1, the siren will blow 30 short blasts, and after an interval, 1 blast. The signal will be given three times. Count the blasts, and you will know the result of the election.

DEFENDANTS SOON TO ANSWER

IN IMPERIAL CASE.

Complaints Dismissed as to Minor

Figures in Dispute Over Former

Management of California Develop-

ment Company—Side of Big Finan-

ciers Concerned Is Yet to Be Heard.

An echo of the sensational suit over a matter of nearly a million dollars, in which former directors of the California Development Company are concerned, has just been heard in the Superior Court. That part of the litigation which pertains to the Cameron Lake Cattle Company and to the late A. H. Heber has been dismissed by reason of the fact that a settlement has been made out of court.

This leaves practically unchanged, however, the main suit, in which the California Development Company, of which Col. Epes Randolph, representing the Southern Pacific interests, is

Doctors from All Over the

Country Expected.

From June 18 to 21 Los Angeles will entertain the members of the National Eclectic Medical Association, a body of about 300 men and women from all parts of the United States.

Los Angeles is also to be the meeting place of the California State Eclectic Association, on the day before the opening of the national convention.

The headquarters of the national association will be the Hotel Alexandria. The forenoon are to be devoted to work, and the afternoon and evening to pleasure.

The local Entertainment Committee has been sending out literature to the expected visitors, and urging them to remain at least a week after the close of the meeting, so that they may see the many points of interest in the city and vicinity.

Two special excursion parties in private cars will bring some of the most prominent practitioners of the eclectic school to Los Angeles. One of these parties will start from Boston, and will acquire additional members at New York and Chicago. This party will reach Riverside next Monday afternoon, and will be entertained there by the Chamber of Commerce and citizens. A Reception Committee, headed by Dr. O. C. Welton, will go to Riverside to meet this party.

Another special party will be composed of Cincinnati, St. Louis and Texas doctors, who will stop at the Grand Cañon of the Colorado. They will arrive in Los Angeles on Monday morning at 8 o'clock. A Reception Committee, composed of Dr. J. A. Munk, Dr. G. W. Finch and Dr. H. B. Brown, will meet this company at San Bernardino.

On Monday the State association will convene in Blanchard Hall on South Broadway. The officers of the association are: Dr. Ben Stetson of Napa, president; Dr. J. A. Munk, Br. vice-president; Dr. L. Dee Harris of Oakland, second vice-president; Dr. George H. Greenwell of Los Angeles, third vice-president; Dr. H. Dandrea of Ocean View, San Francisco, treasurer; Dr. J. Park Douglas, recording secretary.

NOTABLES EXPECTED.

Among the notables in the eclectic world who will be here are Prof. John Uri Lloyd of Cincinnati, and Dr. J. M. Scudder, who conceived and perfected the plan for making eclectic medicines of uniform strength and reliability.

Prof. Lloyd is the founder of the Lloyd Library, one of the most famous botanical and pharmaceutical libraries in the world. It contains books dating back almost to the beginning of the days of printing. The library is used for reference by students from many countries.

In the will of the late Surgeon-General James H. Patterson, of the War Department, a clause gives to the Lloyd Library a fund of \$30,000, and the entire library of this distinguished scientist.

Prof. Lloyd is also the editor of the Eclectic Medical Gleaner, and has written several books of Southern folklore, including "Stringtown on the Pike," and "Warwick of the Knobs."

Another man prominent in the eclectic school is a Los Angeles resident, Dr. Joseph Amos Munk, who has served the national association in various official capacities, and who is dean and professor of climatology in the Los Angeles Eclectic Full-time, which he was active in founding.

Dr. Munk, too, is a literateur. He is the author of several books and has made an especial study of nature in Arizona.

Other leaders who are expected here are Dr. Finley Ellingwood, of the Bennett Medical College at Chicago; Dr. W. G. Boskowitz, of the Eclectic Medical College of New York City; Dr. P. C. Clayberg, dean of the American Medical College of St. Louis; Dr. G. Adolphus of the Southern Eclectic College at Atlanta, Ga.; Dr. William of New Jersey, and Dr. Thomas of Cincinnati.

The local committee on arrangements has provided for a lecture by Prof. Lloyd before the association at Hotel Alexandria, on Tuesday evening, on the subject of "Turkey and Arabia."

On Wednesday the visitors will go to Pasadena, where the Chamber of Commerce will provide tallies, and on Thursday afternoon and evening they will be entertained at Long Beach. Dr. L. A. Perce and the Long Beach Chamber of Commerce being the hosts.

WEEK'S PROGRAMME.

The first session of the annual convention is to convene at 8 o'clock
